EDUCATION

UNIVERSITY OF CINCINNATI

College of Design,
Architecture, Art, and
Planning (DAAP)
Bachelor of Science in
Architecture
Class of 2027
3.98 GPA

ST. JOHN'S JESUIT HIGH SCHOOL & ACADEMY

High School Diploma
2019 - 2023
4.7 GPA
Valedictorian

SKILLS

Adobe Creative Suite
Physical Model Making
Microsoft Suite
Rhinoceros 3D
Grasshopper
Endscape
Revit

INVOLVEMENT

National Organization of Minority
Architecture Students
American Institute of Architecture
Students
Hoxworth Blood Donor
DAAP Bowling

EXPERIENCE

DESIGNER - DOT DASH FALL SEMESTER 2025

- Developed lighting design concepts to highlight architectural form, material, and spatial intent
- Produced project documentation via drawings, renders lighting layouts, and fixture schedules
- Researched fixture performance, lighting strategies, and sustainability requirements

ARCHITECTURAL INTERN - MARMOL RADZINER SPRING SEMESTER 2025

- Produced detailed Revit families for use in renderings and schedules
- Communicated with clients, consultants, and project teams across all phases of design
- Revised and annotated redlines to ensure drawing accuracy and compliance with project standards

ARCHITECTURAL PRACTICE WORKSHOP SERIES DEC 2023, CINCINNATI, OH

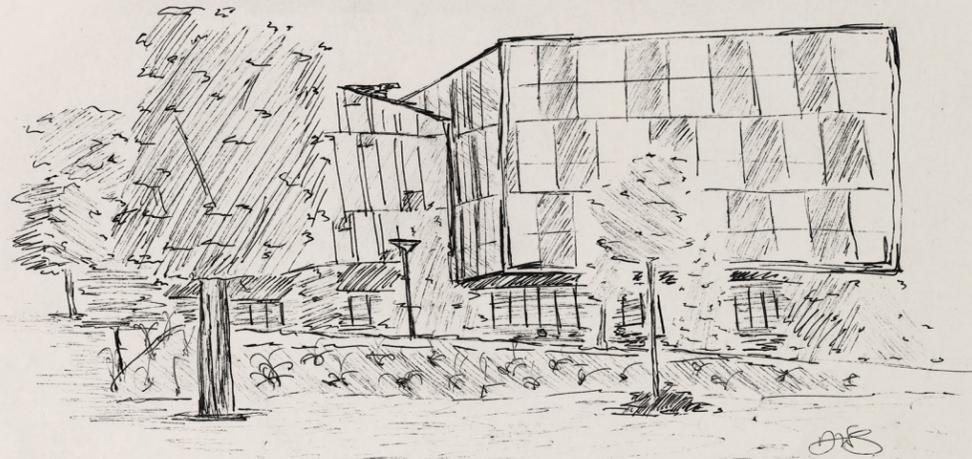

- Several 3-hour intensive workshops in preparation for architectural firm work with multiple Cincinnati firms

FOUNDER - SECOND BITE CINCINNATI AUG 2023 - PRESENT

- Founded Second Bite Cincinnati food rescue initiative
- Developed partnerships for food collection and redistribution
- Managed a team of volunteers, designated responsibilities

LABORER - R.H. TAYLOR MECHANICAL CONTRACTORS, LLC. MAY 2023 - JUL 2023

- Fabricated and installed metalwork projects
- Developed craftsmanship and welding abilities

01 *water folly*

personal work **06**

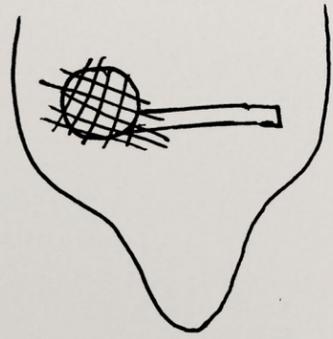

01 *water folly*

A structure along the bank of Burnet Woods Lake. Organized to strategically connect to the park's pedestrian infrastructure, with thresholds connecting interior space to exterior space. Focusing on transparency, views, and tectonics.

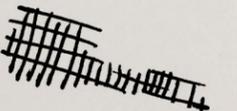

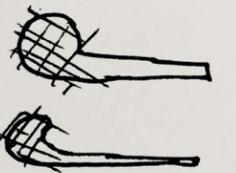

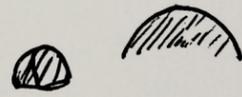

BEAVER LODGE

DOMED STRUCTURE

CONNECT TO BW

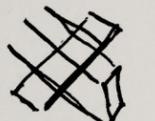

TAPERED?

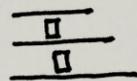

BW 90° TO LAKE

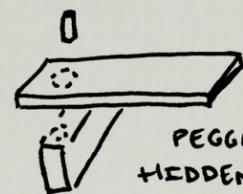

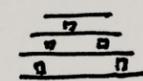

FOLLY 90° TO PATH

OFFSET EDGES

HORIZONTAL W/ SPACERS

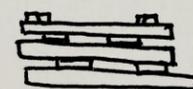

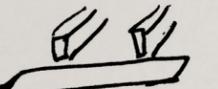

PEGGED & GLUED HIDDEN CONNECTION

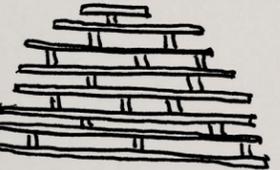

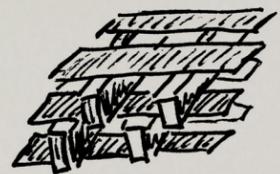

SOLID BASE.

GROUND

WOOD RAISED, FOLIAGE

SOLID @ SIDE

TRANSPARENT @ FRONT & INSIDE

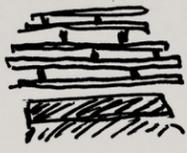

STACKED PIECES

VIEW OUT OF WOODS - SOLID, COMPRESSION

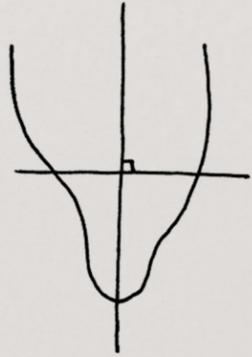

ON BW - SOLID, RELEASE

INSIDE - TRANSPARENT, COMPRESSION

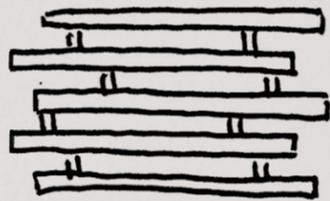

Perpendicular Boardwalk

The boardwalk and its benches sit at a 90° angle to the longest stretch of the lake, providing the best view of the water. Planks spanning the length of the boardwalk draw viewer into the folly, aiding in the sequence of **compression, release, compression** from woods to boardwalk to folly.

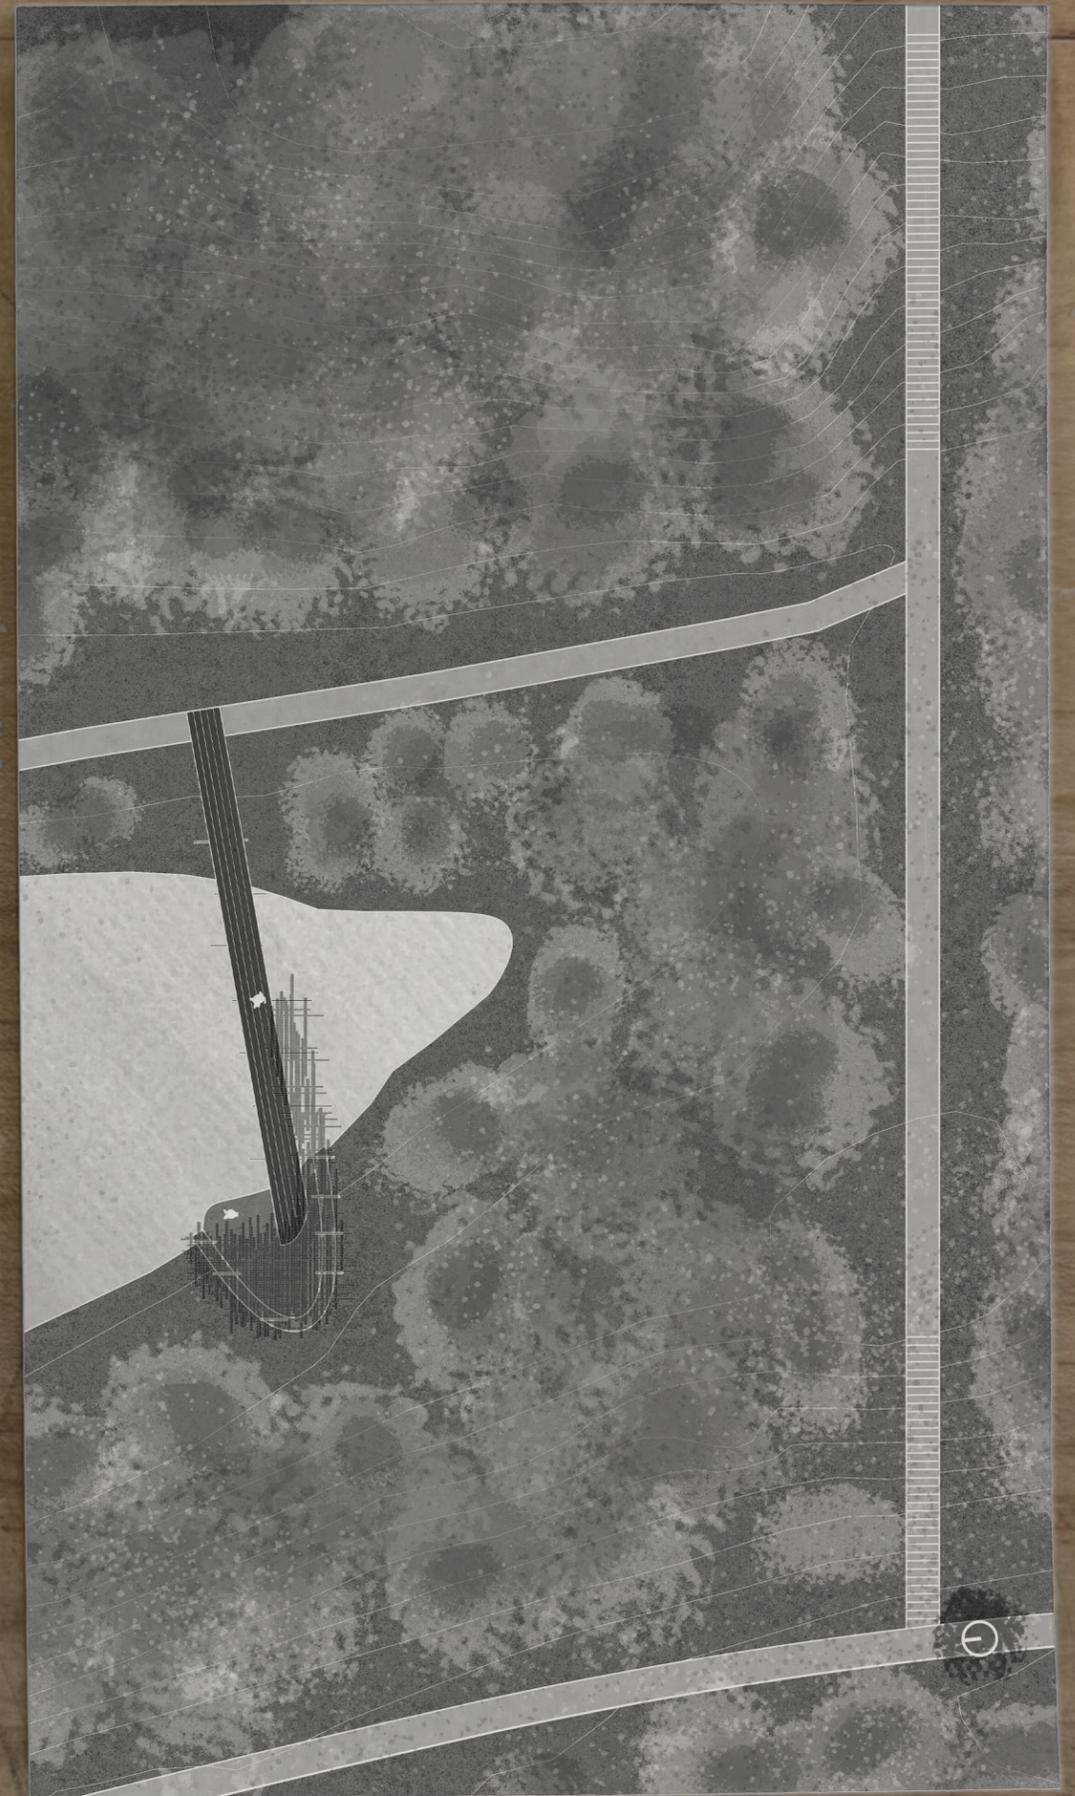

Pseudo-Natural Structure

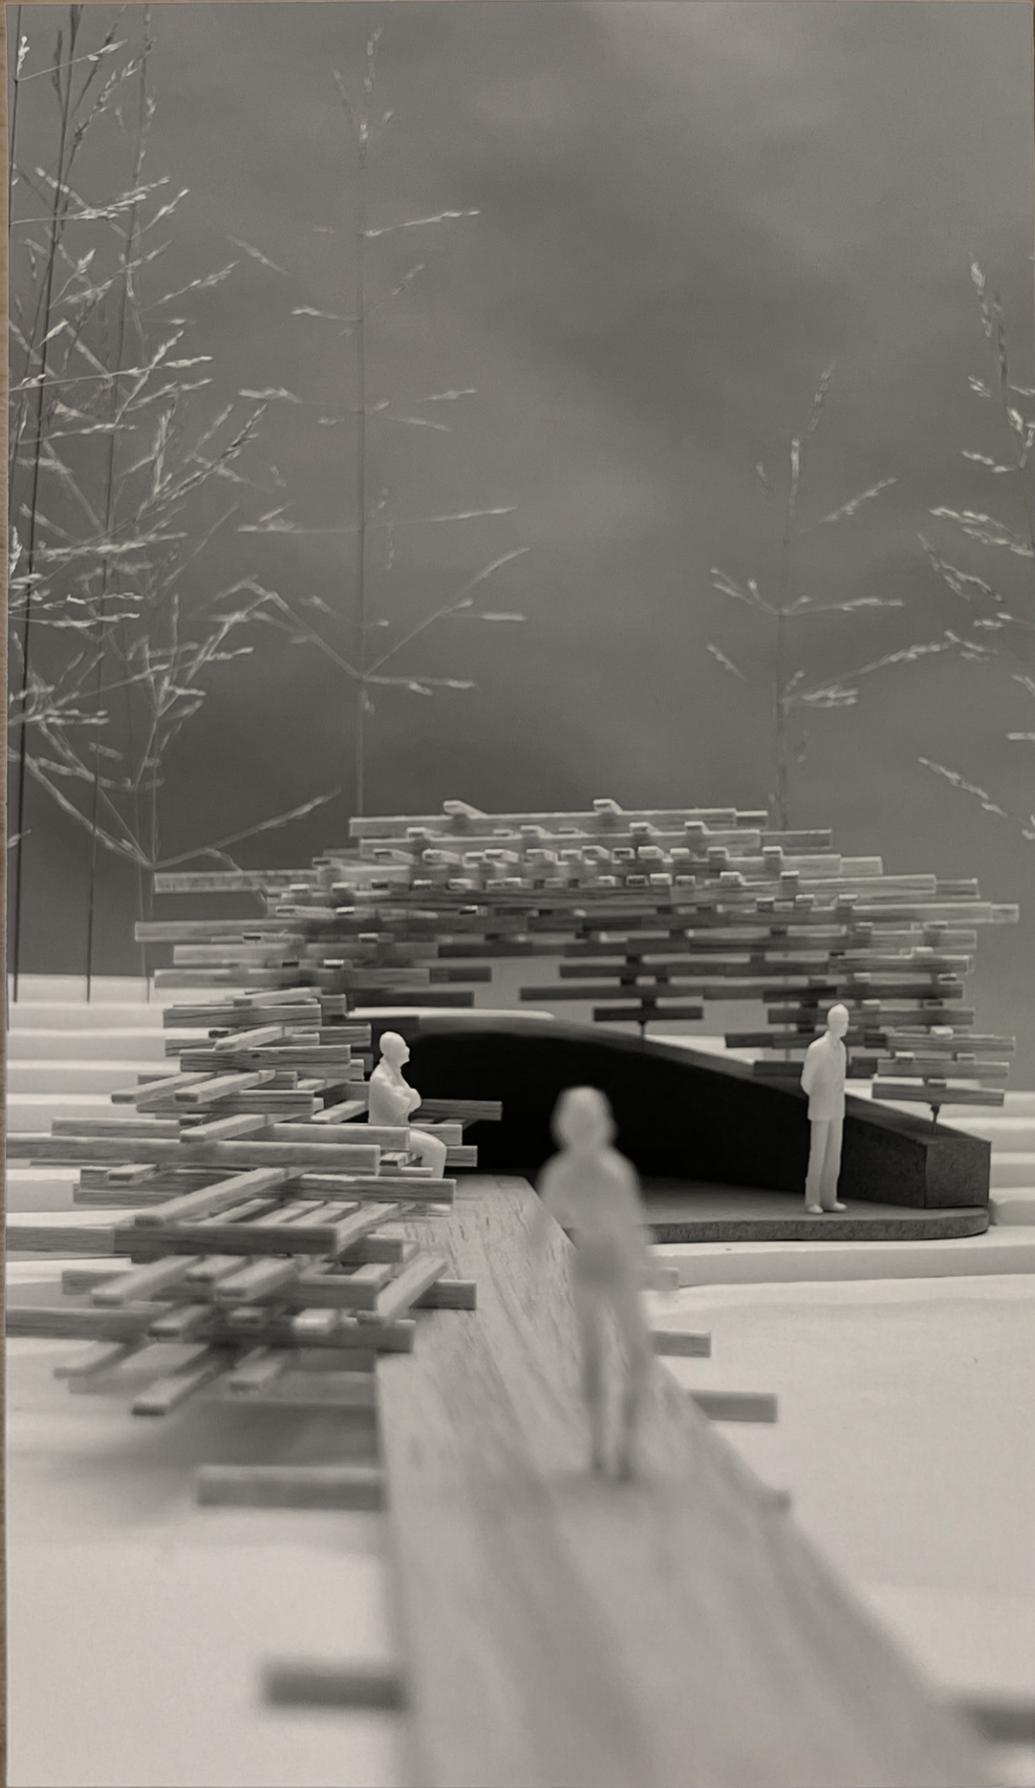

This folly was designed as an extension of its surroundings, not meant to upstage, but to feel **congruous** with the woods and lake. The folly has a solid base and is covered by a domed roof of varying lengths of stacked lumber, resembling form and construction of an American **Beaver lodge**.

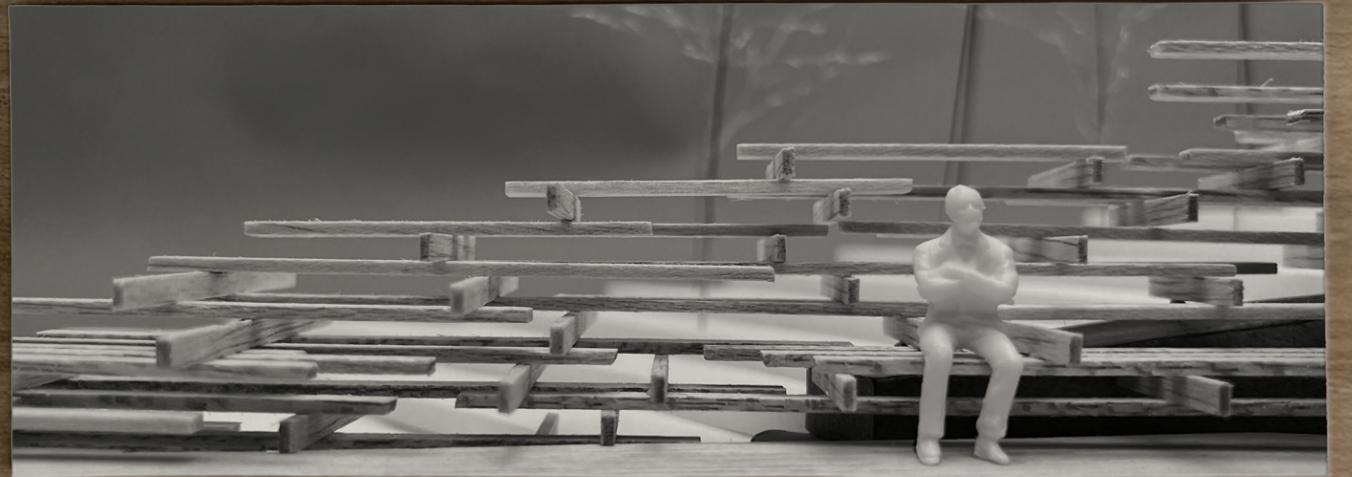

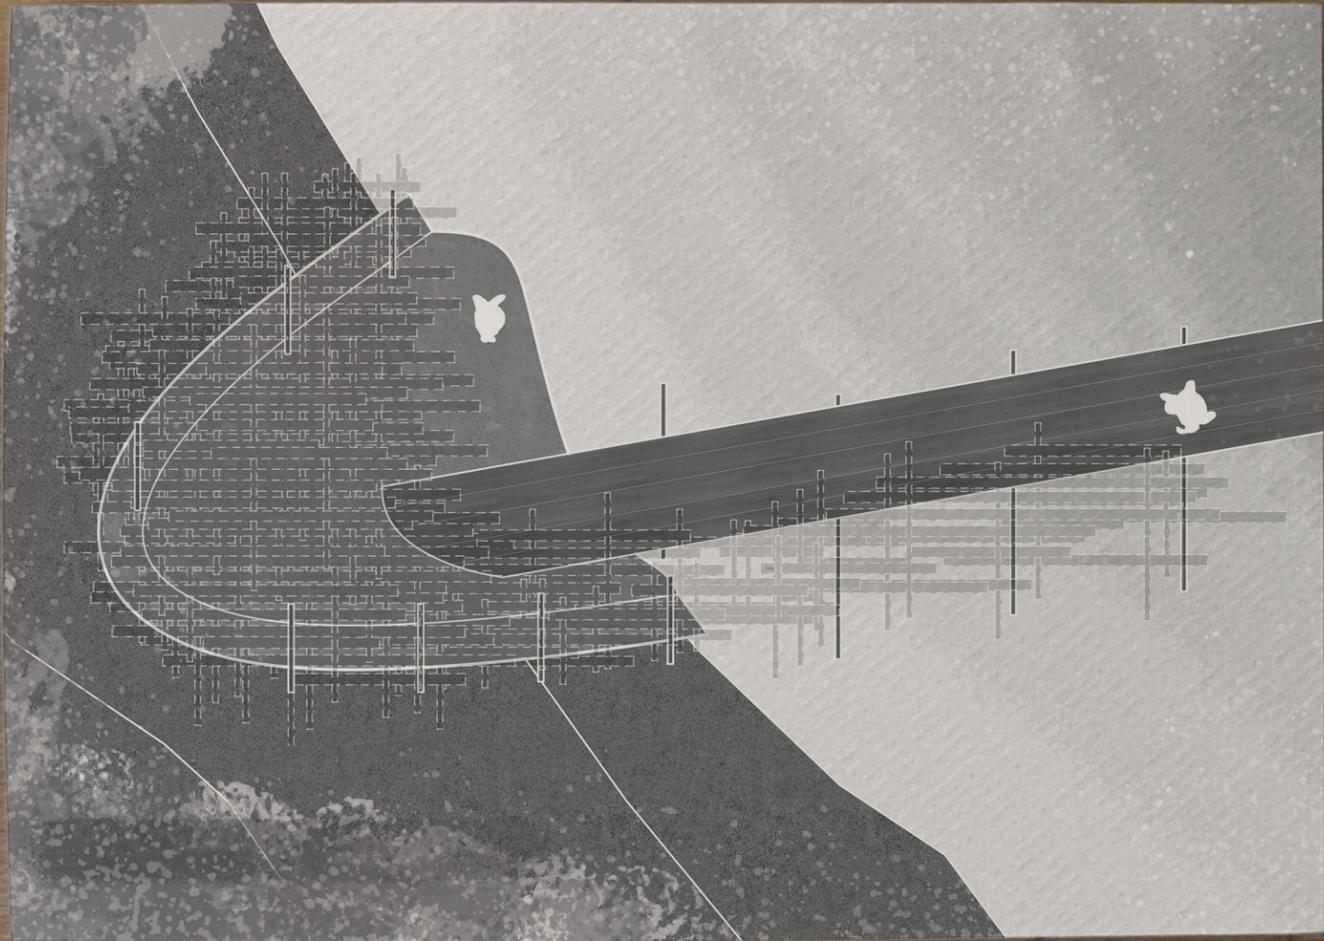

Semi-Transparent Enclosure

The wooden construction aligns to the path along the back of the folly. Long horizontal beams and narrow vertical spacers create a structure that shifts between **solidity** and **transparency**. The orientation **minimally obstructs** views of the lake from behind or inside, while appearing **solid** on approach.

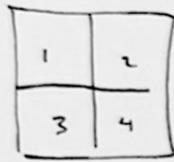

02 *campfire cabin*

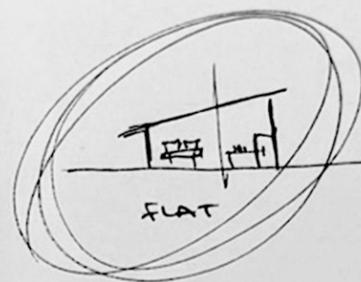

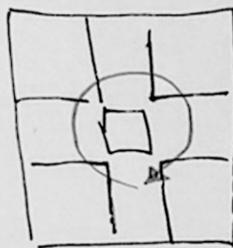

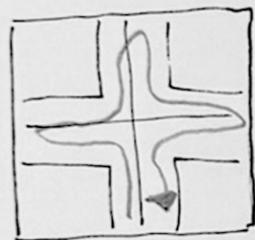

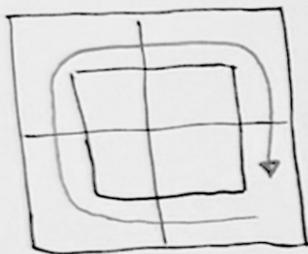

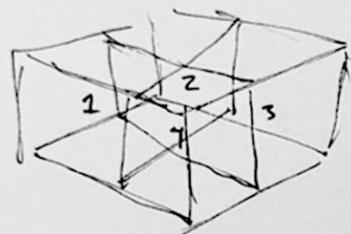

A personal project on a **secluded** plot of land in Drummond Island, Michigan. An **escape** for one or two, the cabin is completely **off grid** with no **electric**. Designed for **intimacy**, **views of nature**, and to hold a stockpile of **books**.

03 modular unit

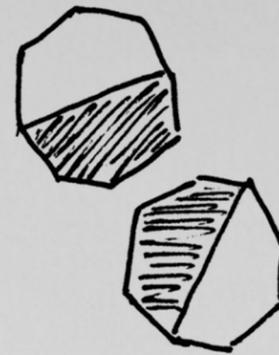

An exploration of modularity. Focusing on how repetitive elements combine to create cohesive systems and language. This project explores materiality, tectonic connection, and light.

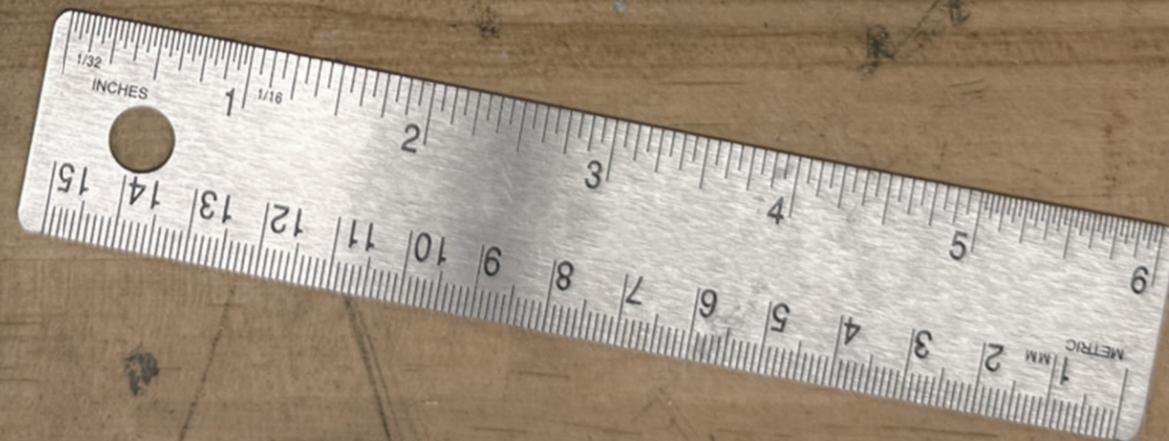

Notched Octagon

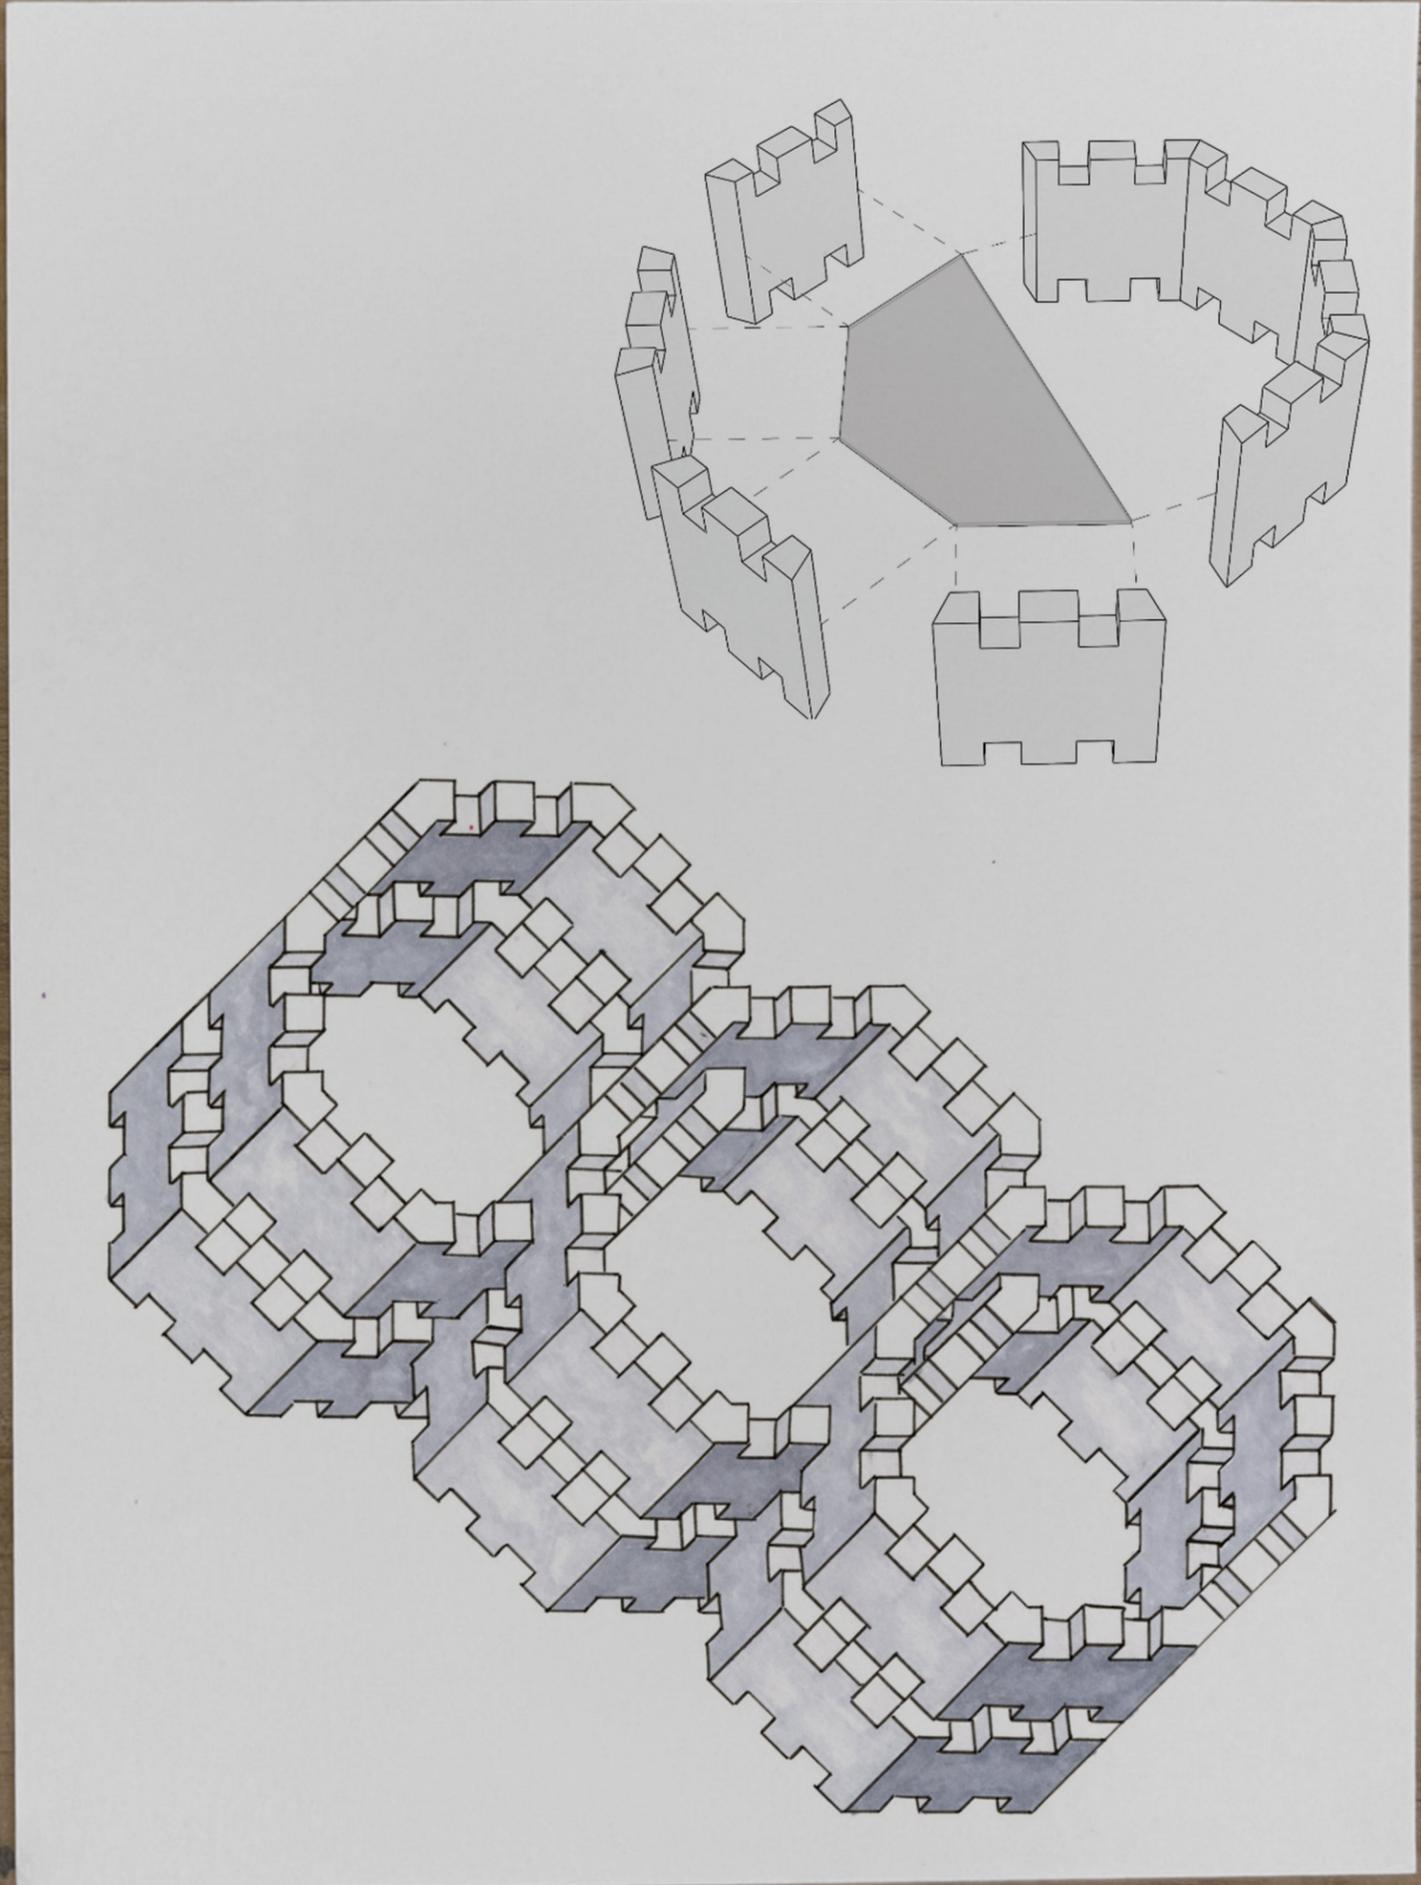

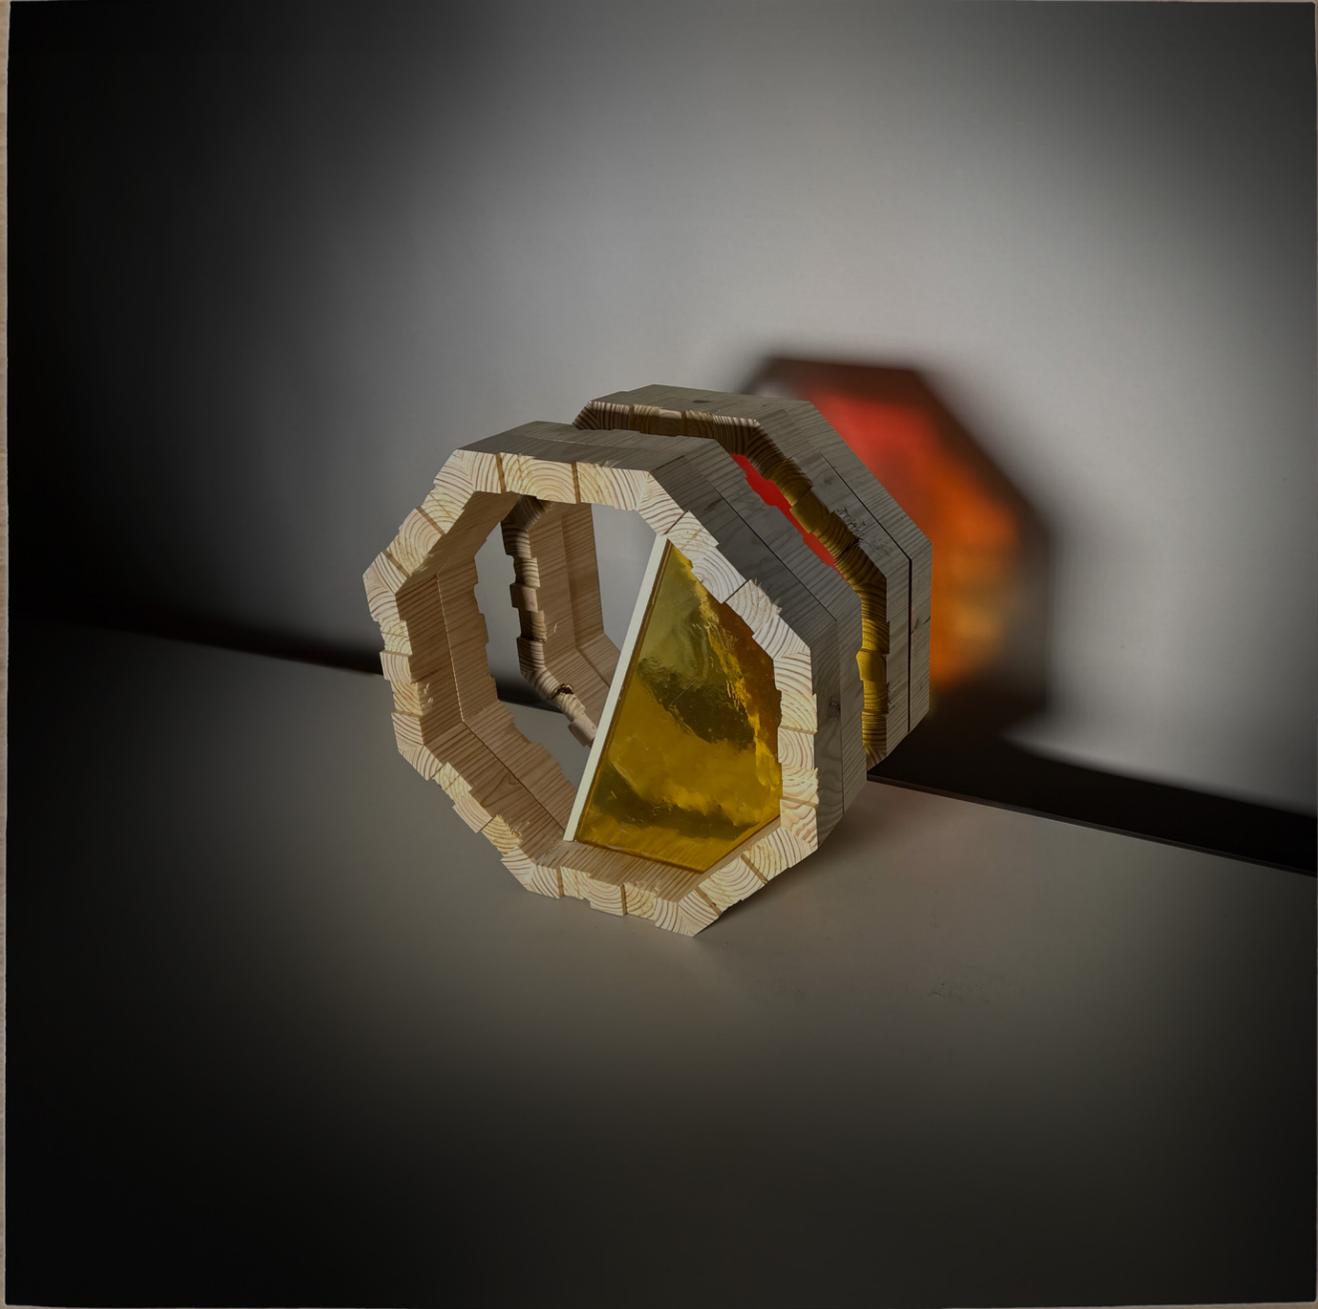

Each unit features 16 notches along its octagonal perimeter. Units interlock at two 90° angles to allow study connection for vertical and horizontal aggregation. Two units can connect in 32 unique ways while still maintaining a cohesive language of connection.

Colored Panes

Oak frames suspend a translucent resin panes across thier center. Each pane casts colored shadows, changing based on aggregation. Red and yellow were chosen to focus on primary color and overlap and create a bipartite language between otherwise identical units.

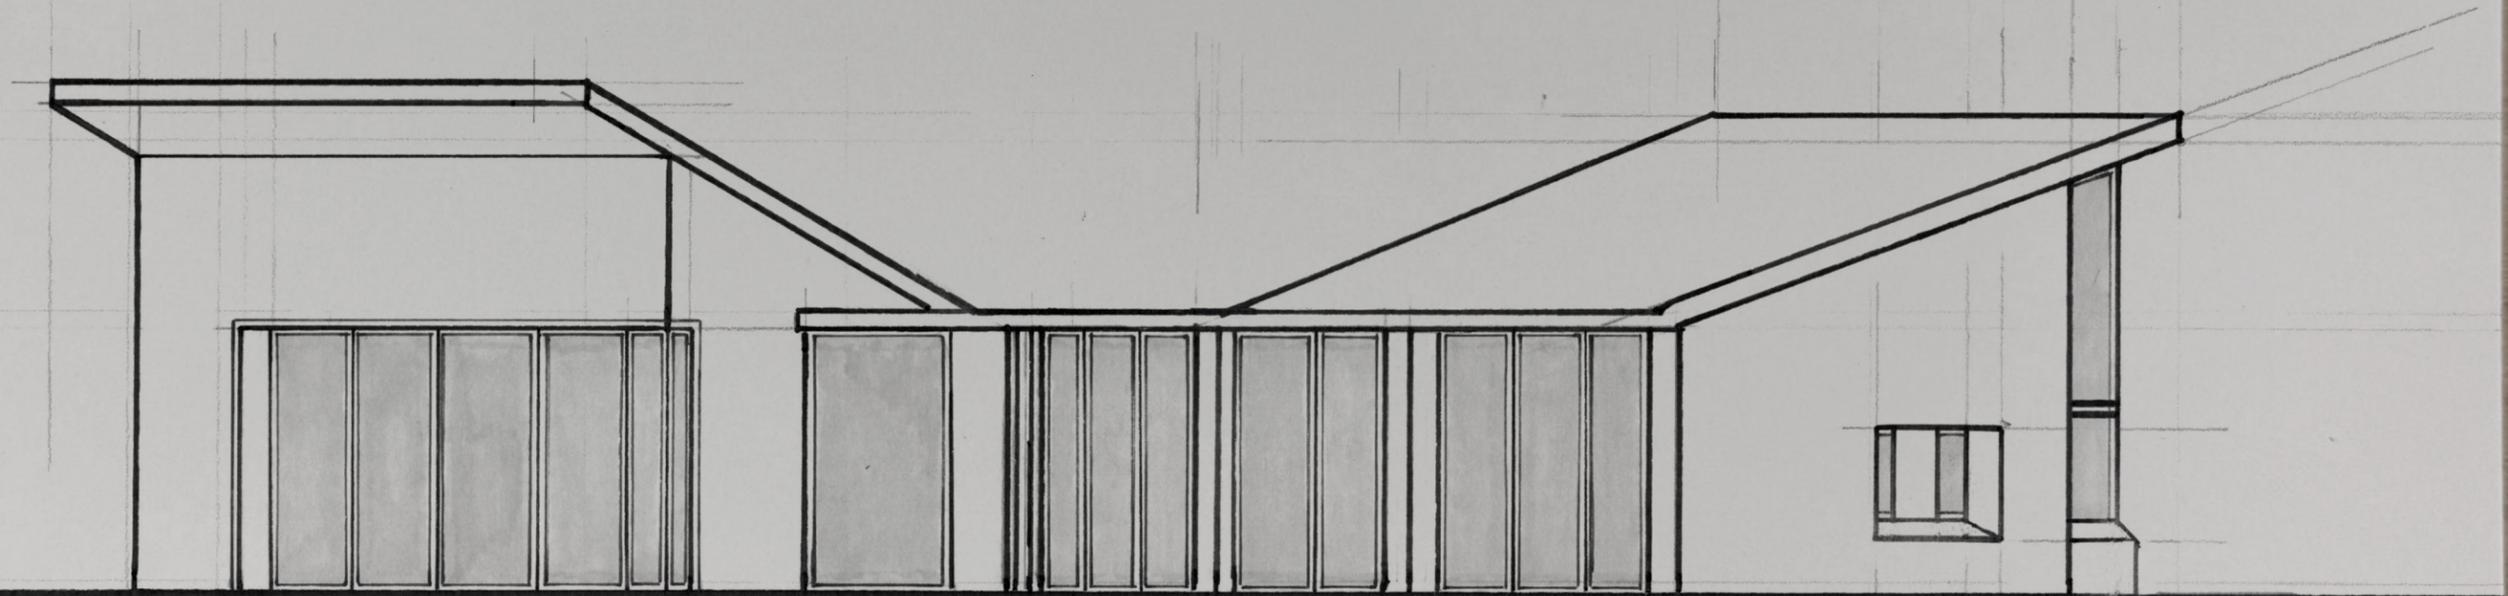

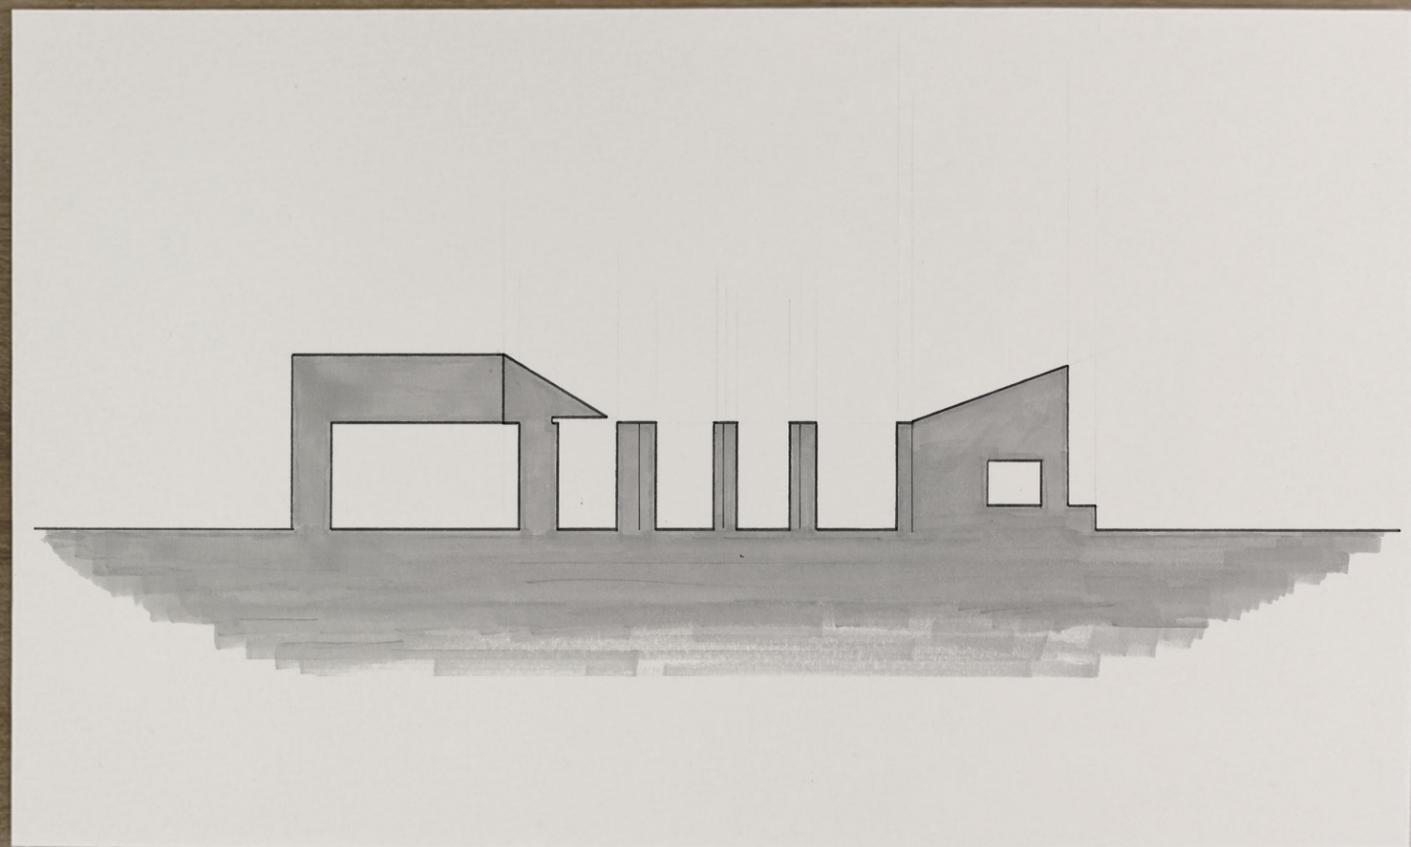

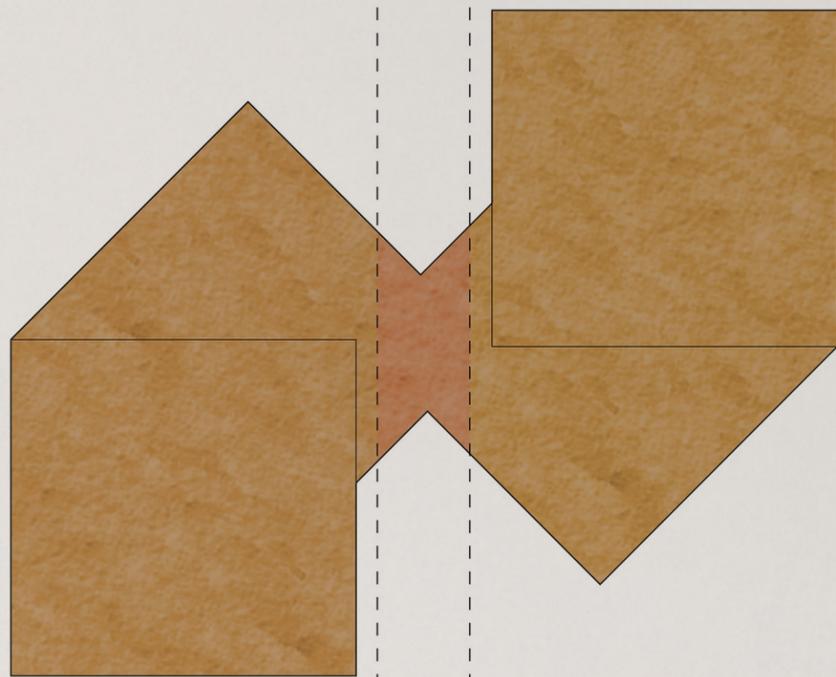

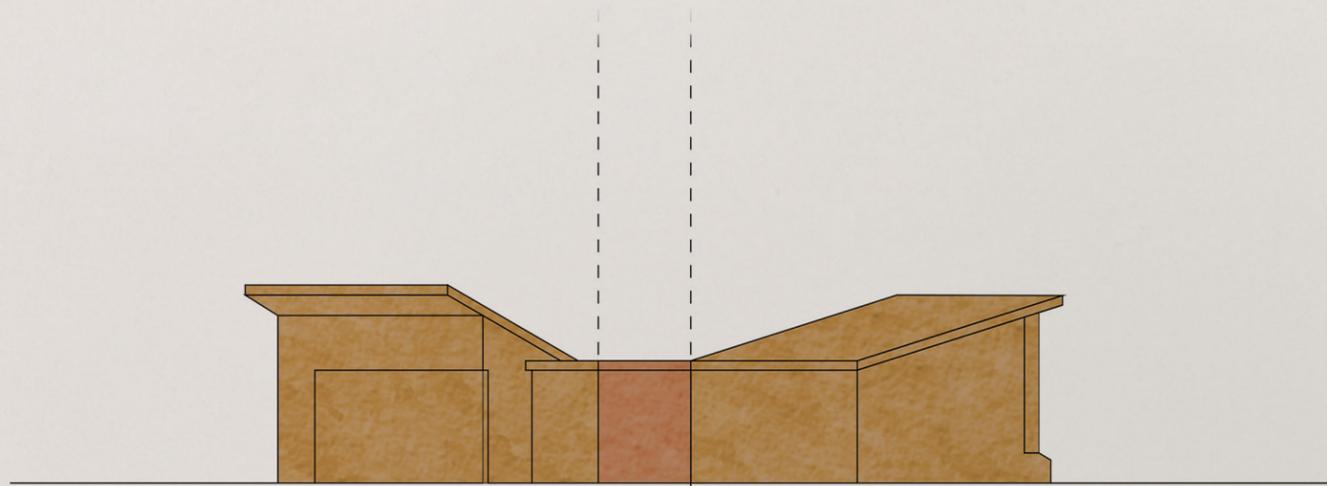

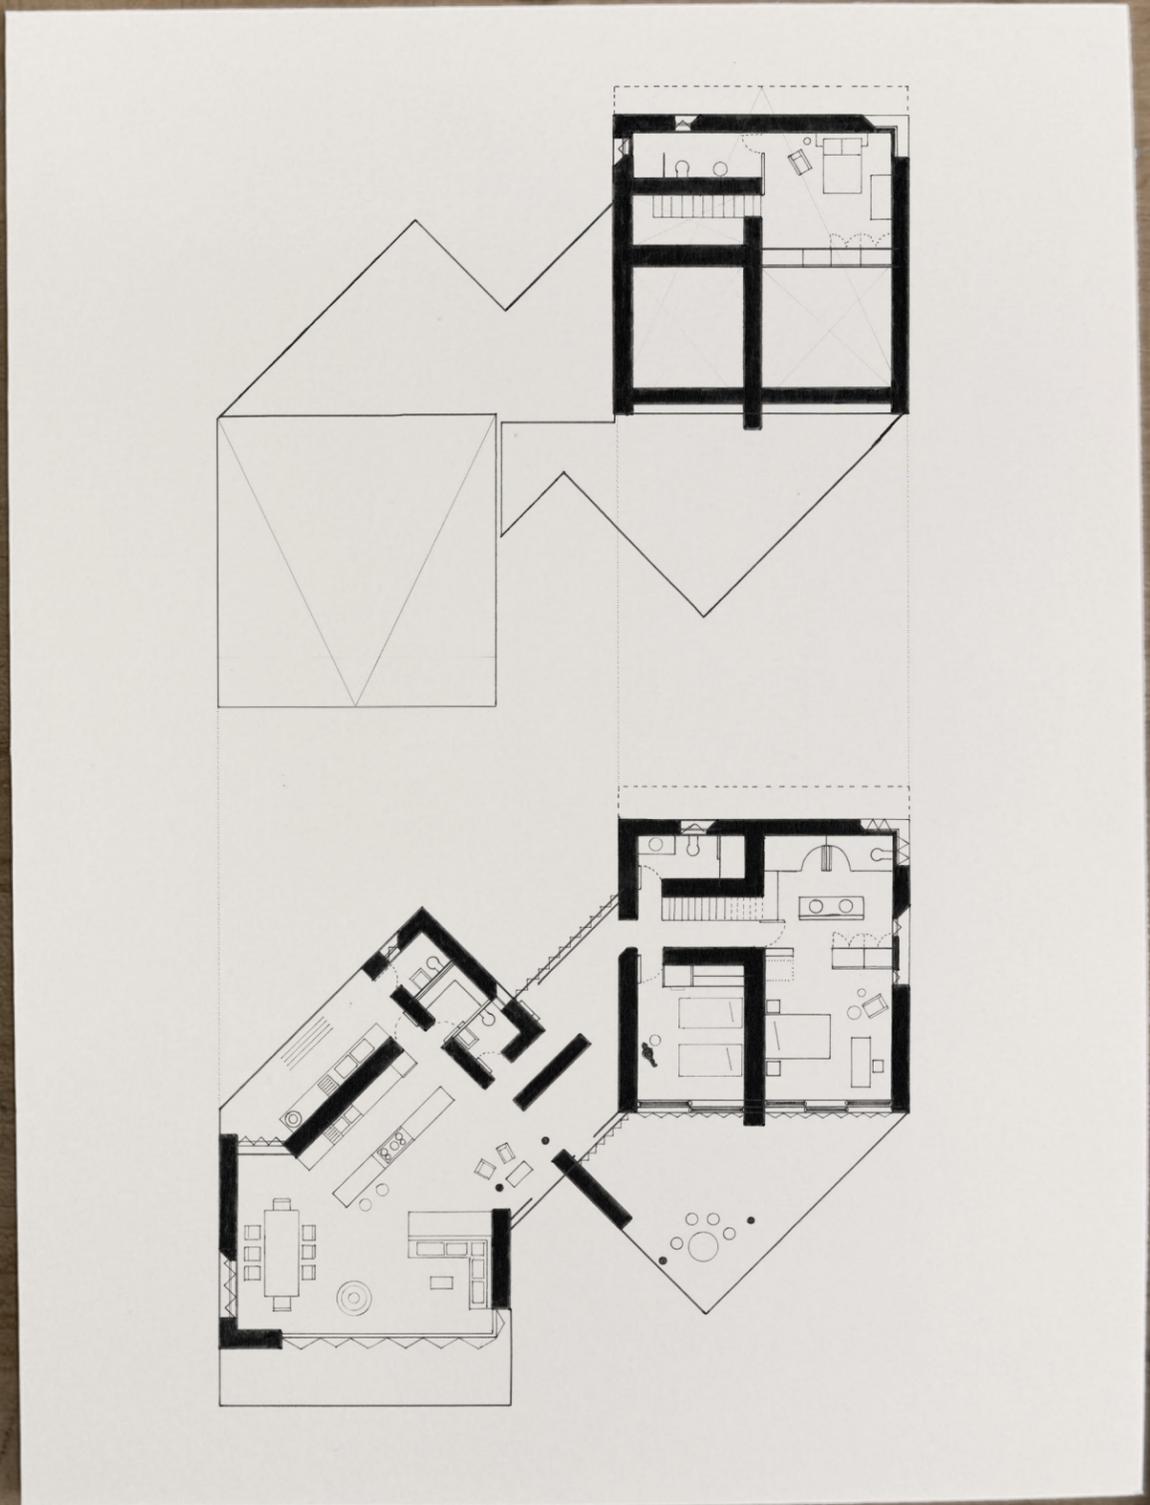

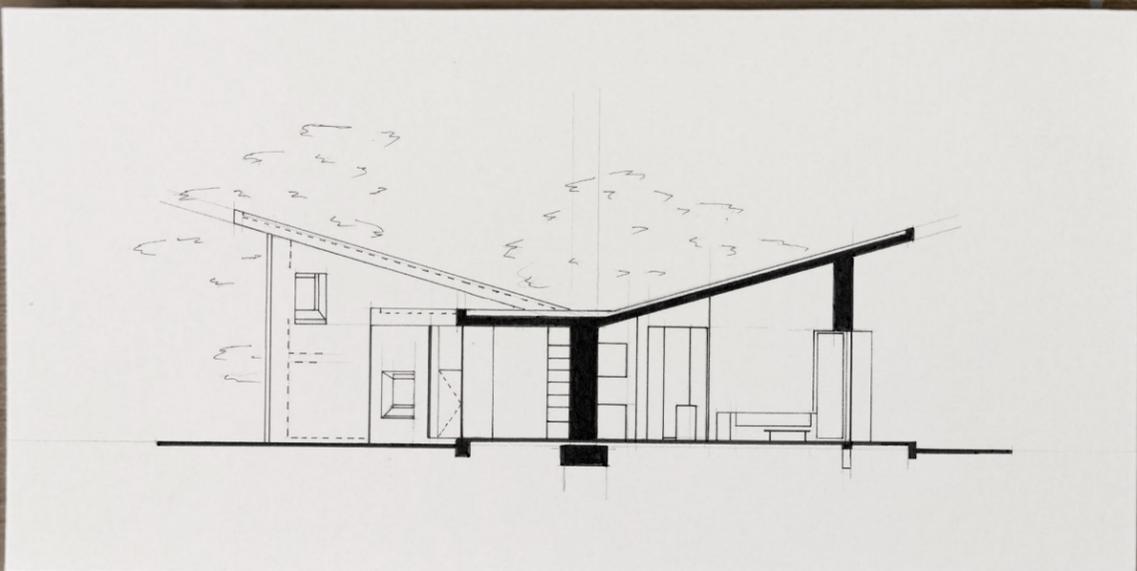

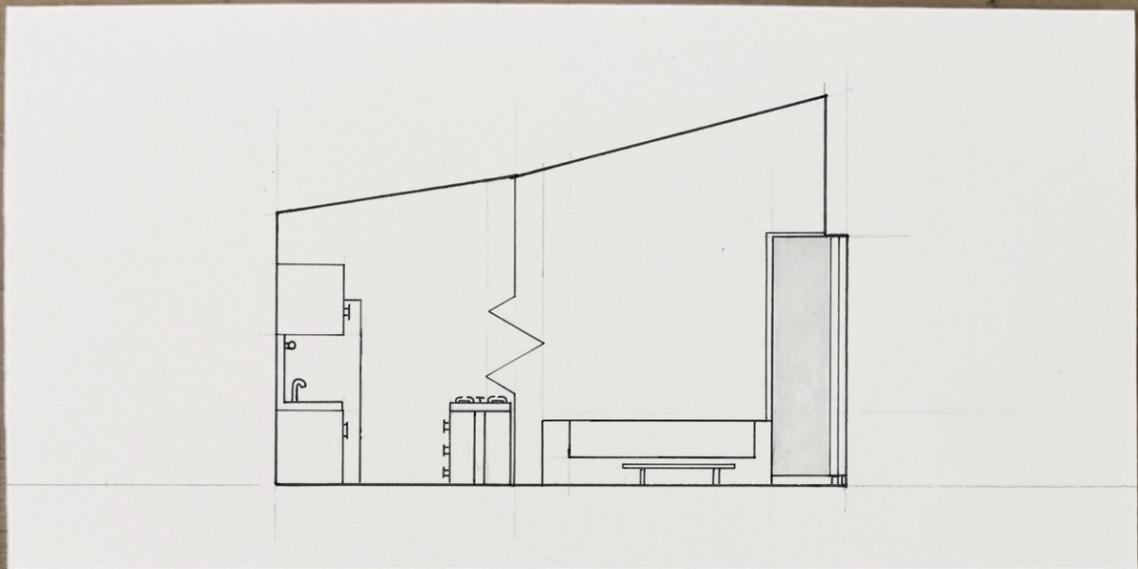

04 *ajijic house*

A case study of Tatiana Bilbao's *Ajijic House*. A geometric, **rammed earth** house in Jalostitlán, Mexico. Stimulating consideration of **materiality**, geometry, and **orientation**.

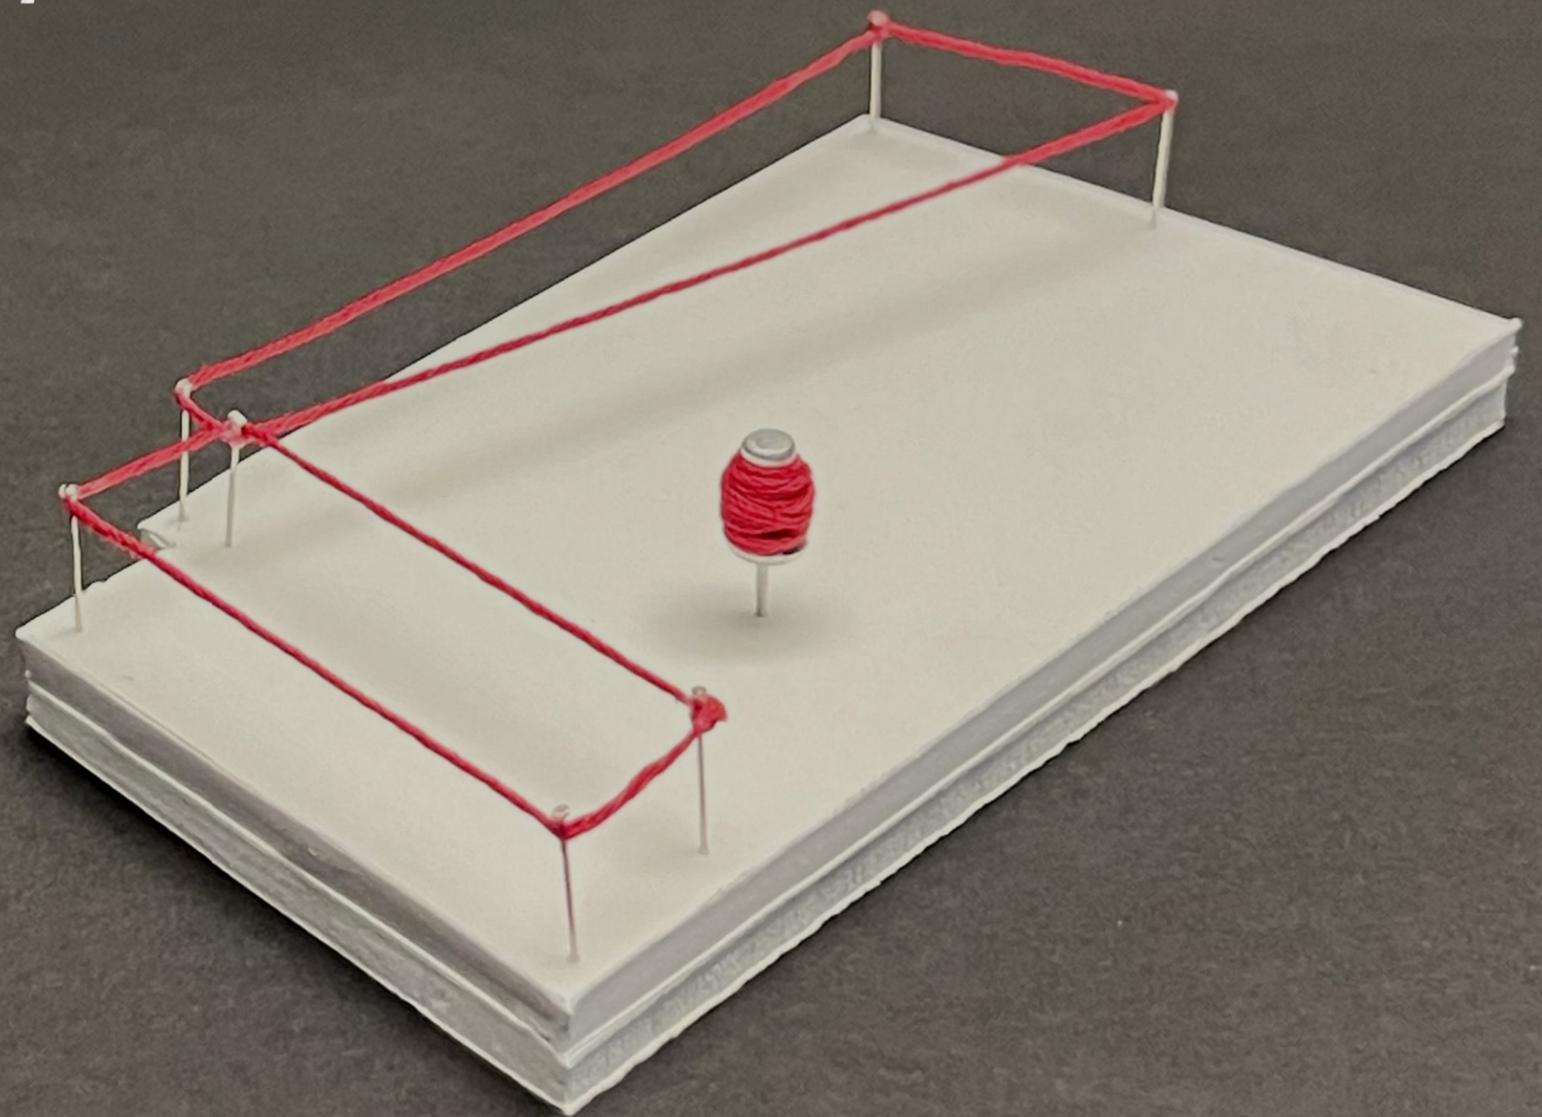

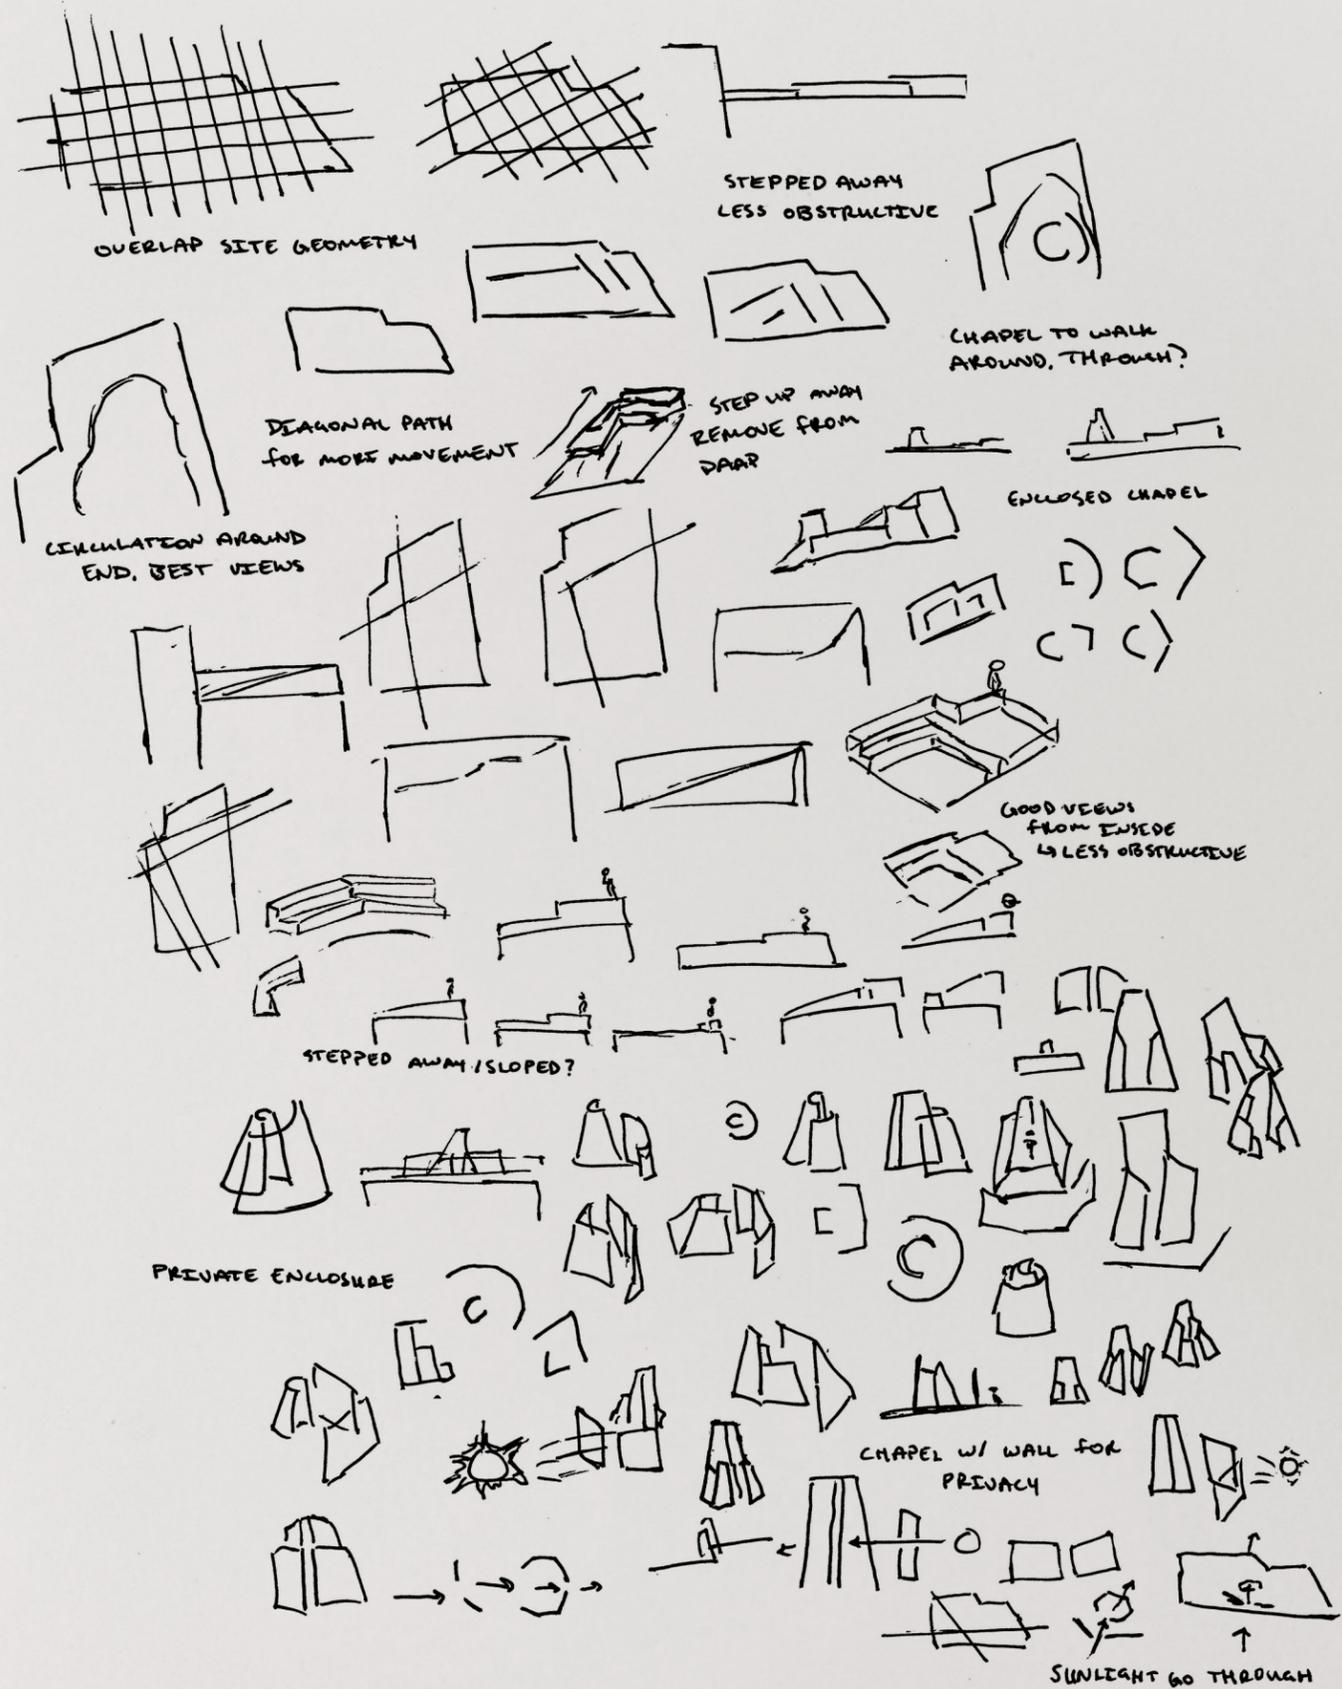

05 rooftop pavilion

An open-air pavilion on the roof of the materials library at the design, architecture, art, and planning building at the University of Cincinnati. Designed as an all-season event space with an emphasis on **site integration**, **movement**, and implied spaces.

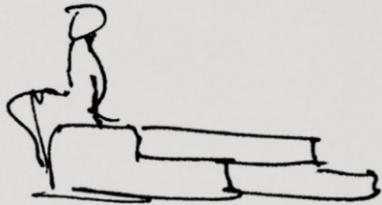

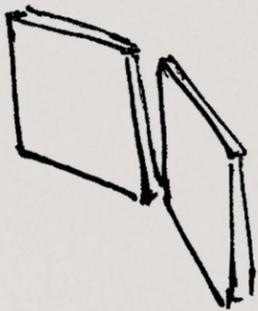

Central Chapel

The chapel serves as a point of **intrigue** to draw inhabitants out of the material library onto the pavilion. It acts as a point of **circumambulation** on the exterior as well as a point of rest in the interior. It is partially enclosed and can be used **solitarily** or **socially**.

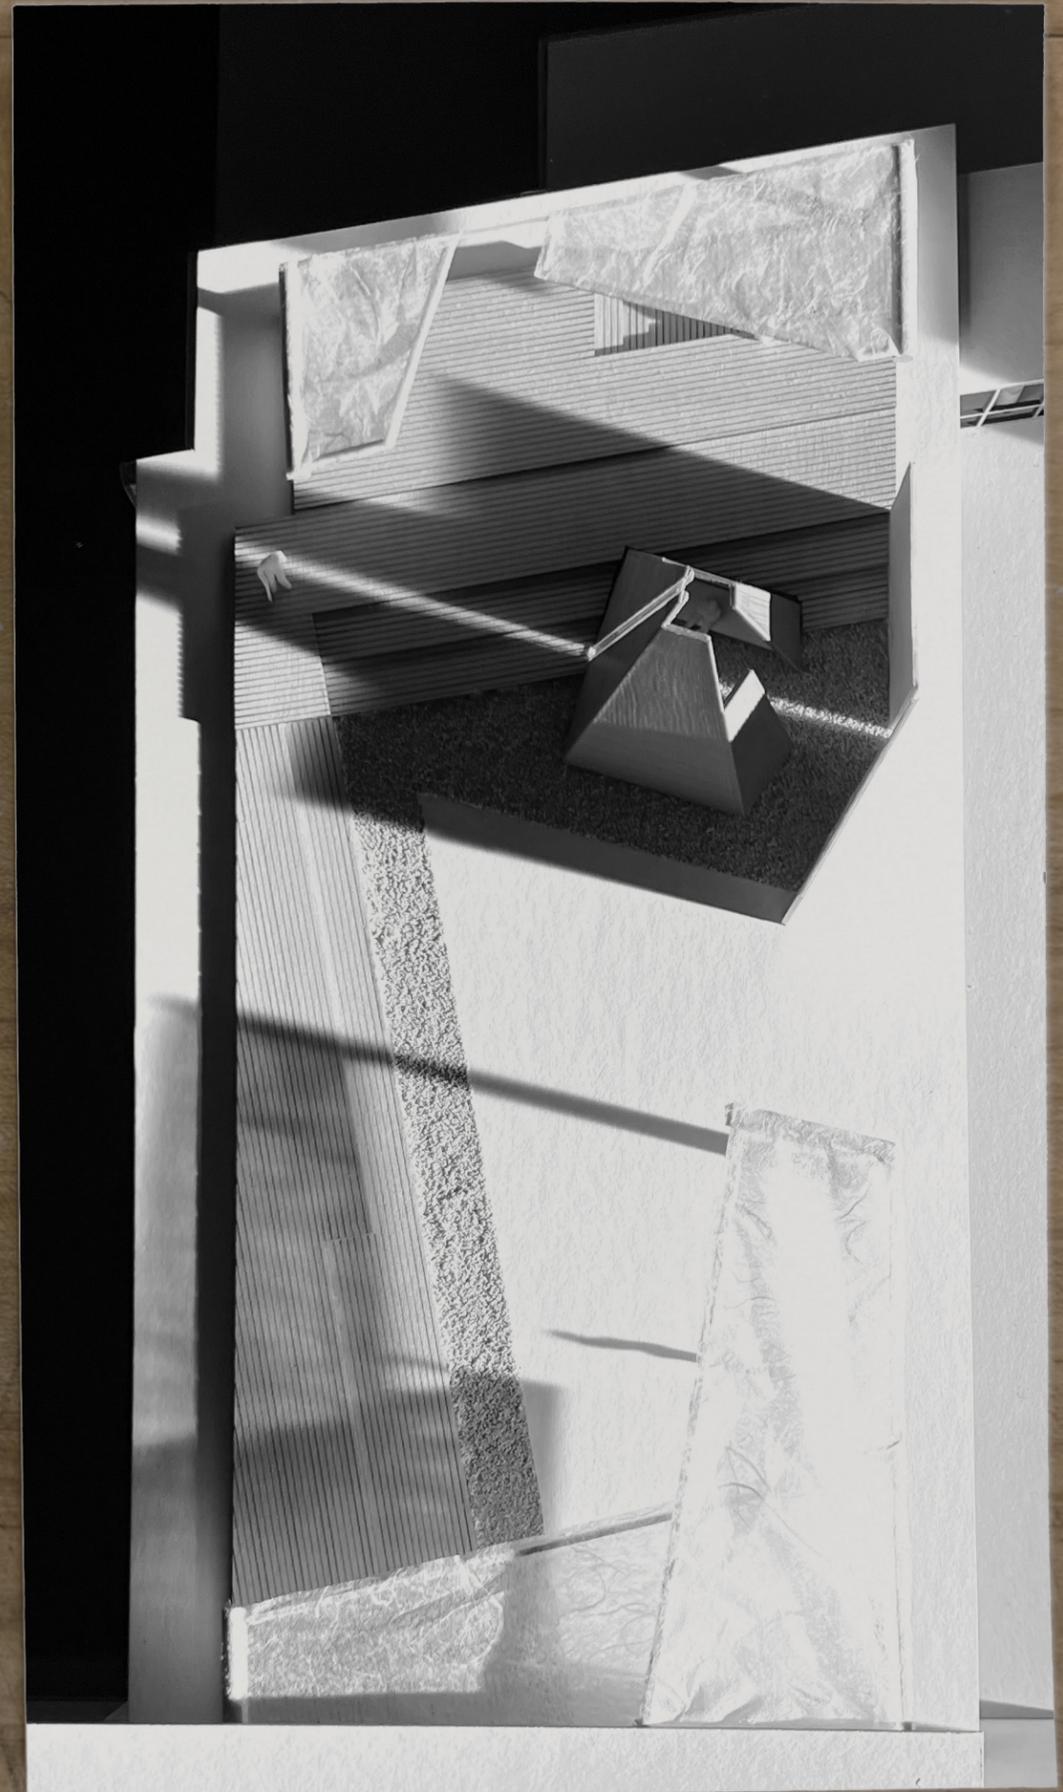

Hybrid Stair

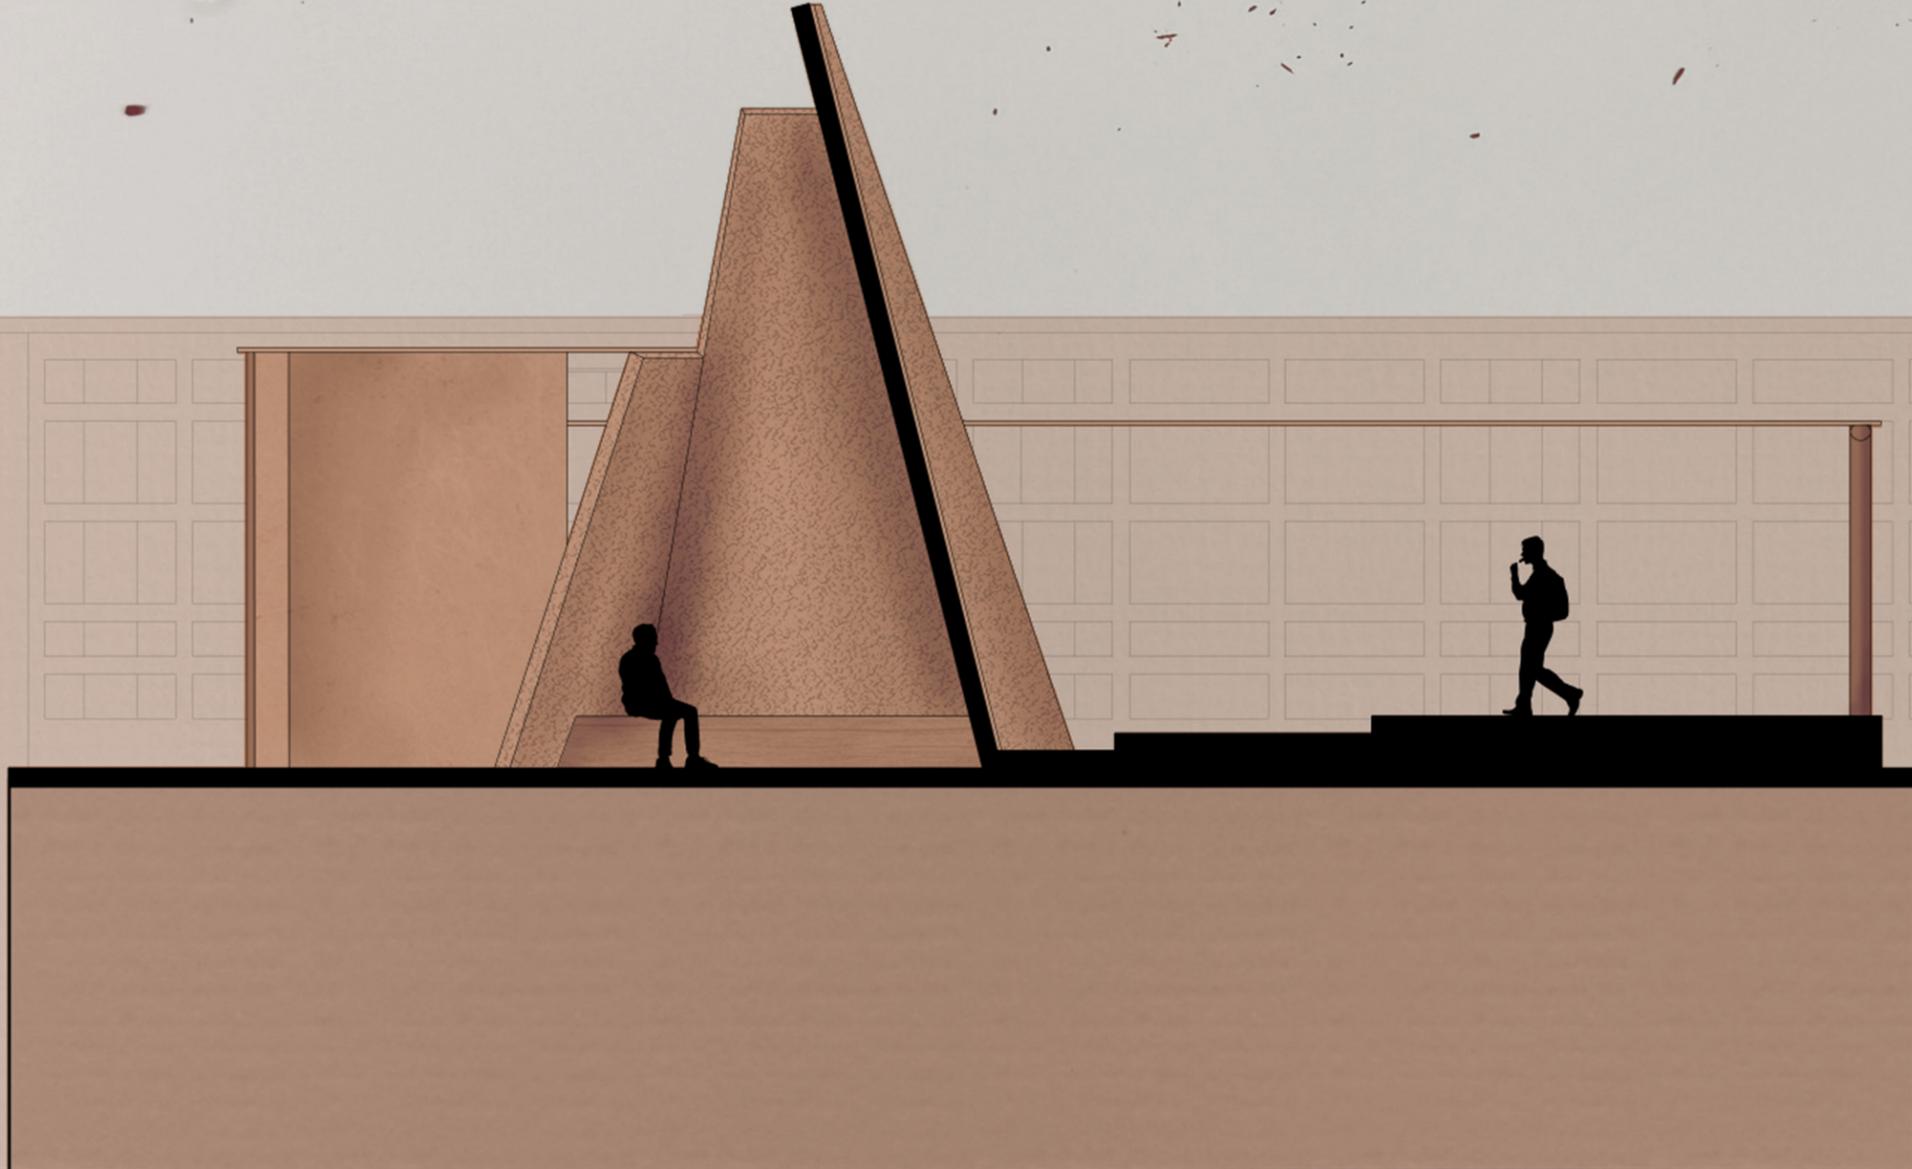

The stair feature leads to an outlook at the far end of the pavilion. Long lines in the stair promote **movement** out of the building and **around** the chapel. The placement of the outlook and sunken seats provide **minimally obstructed** views from inside the building.

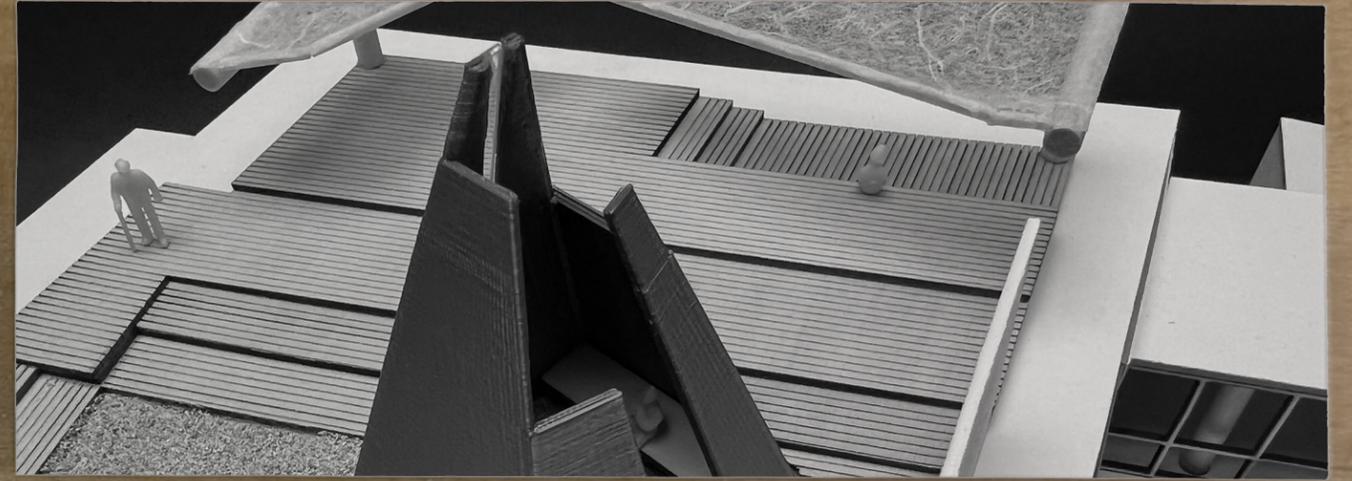

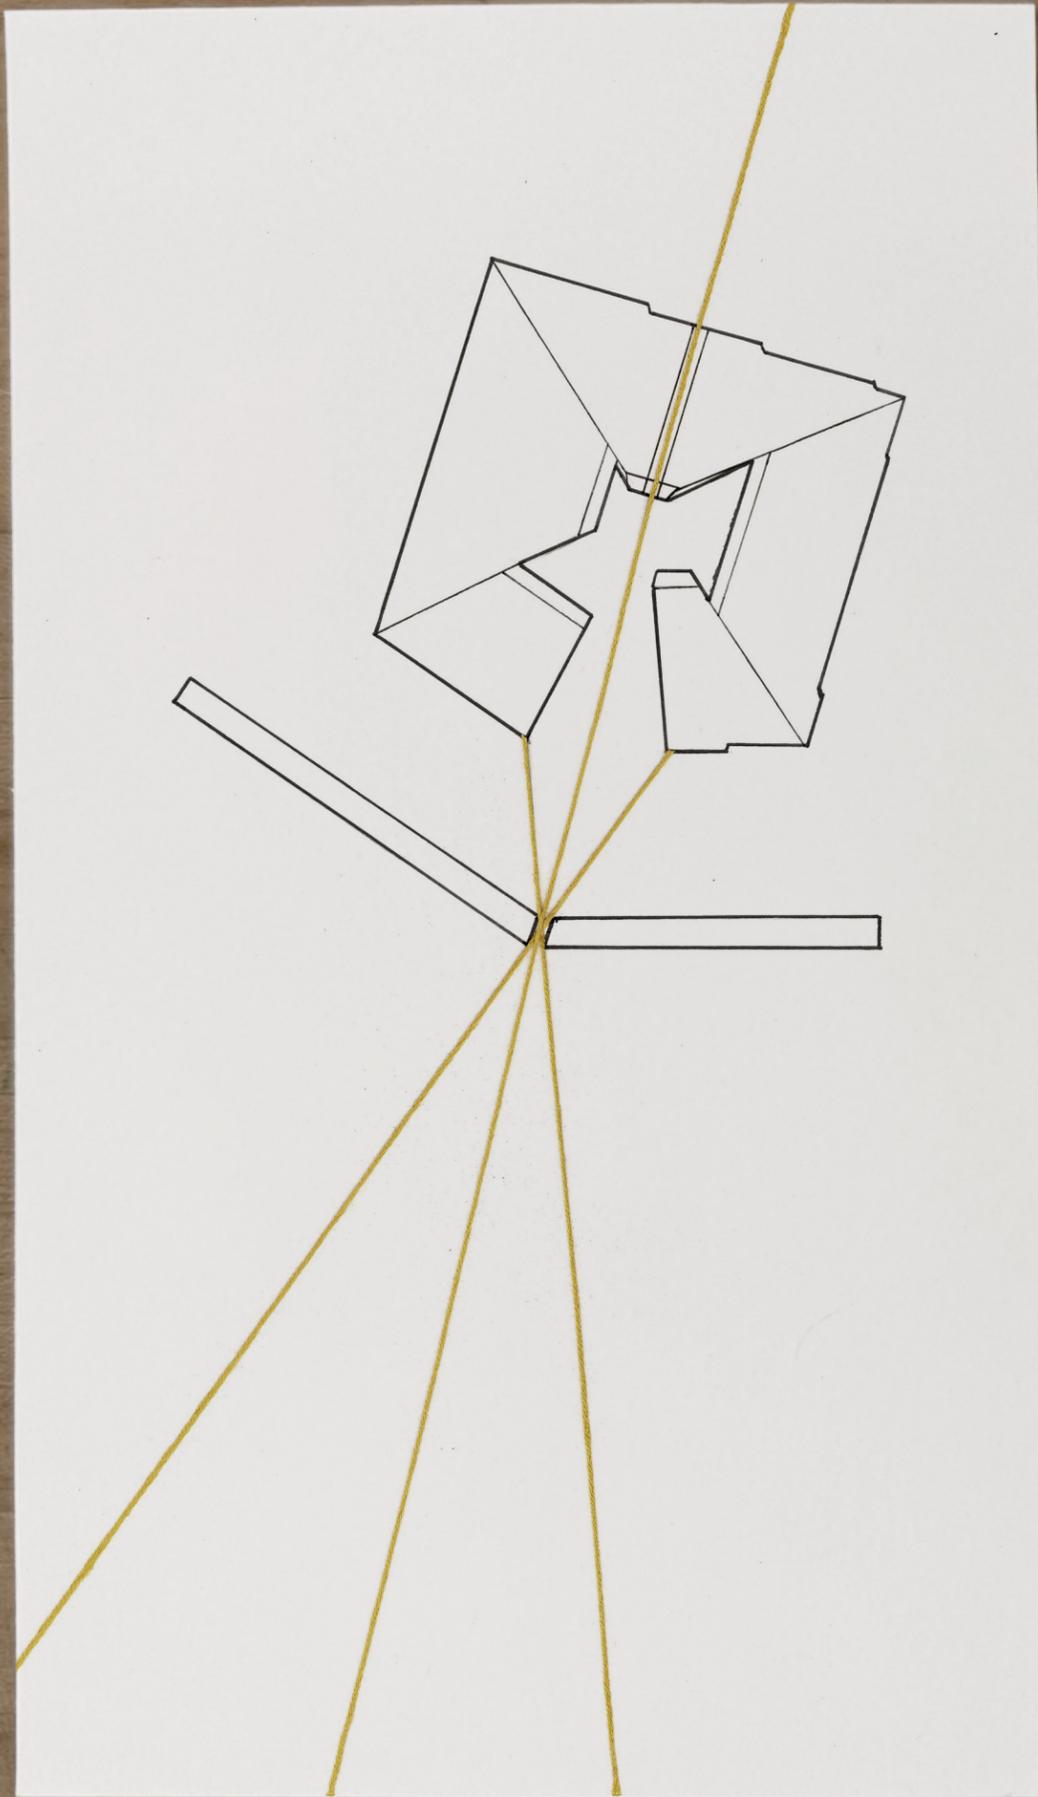

Walled Aperture

The walls adjacent to the chapel serve as an **aperture** to direct the **sun's light** through the glass channel along the chapel's back, resulting in an exciting interaction between observer and environment. The walls also provide **privacy** to the open chapel.

06 *personal work*

A collection of selected personal works

dan schuman

I Love The Night

I love the night
Not for a cup of hot drink
with a book's soft close
Nor the sun's adieu in pink,
orange, & red I suppose

Not for the starlit sonata
conducted by the moon
Nor cricket's fermata
decrescendoed too soon

for when I close my eyes
and my dreams take flight
I always end up with you
late in the night

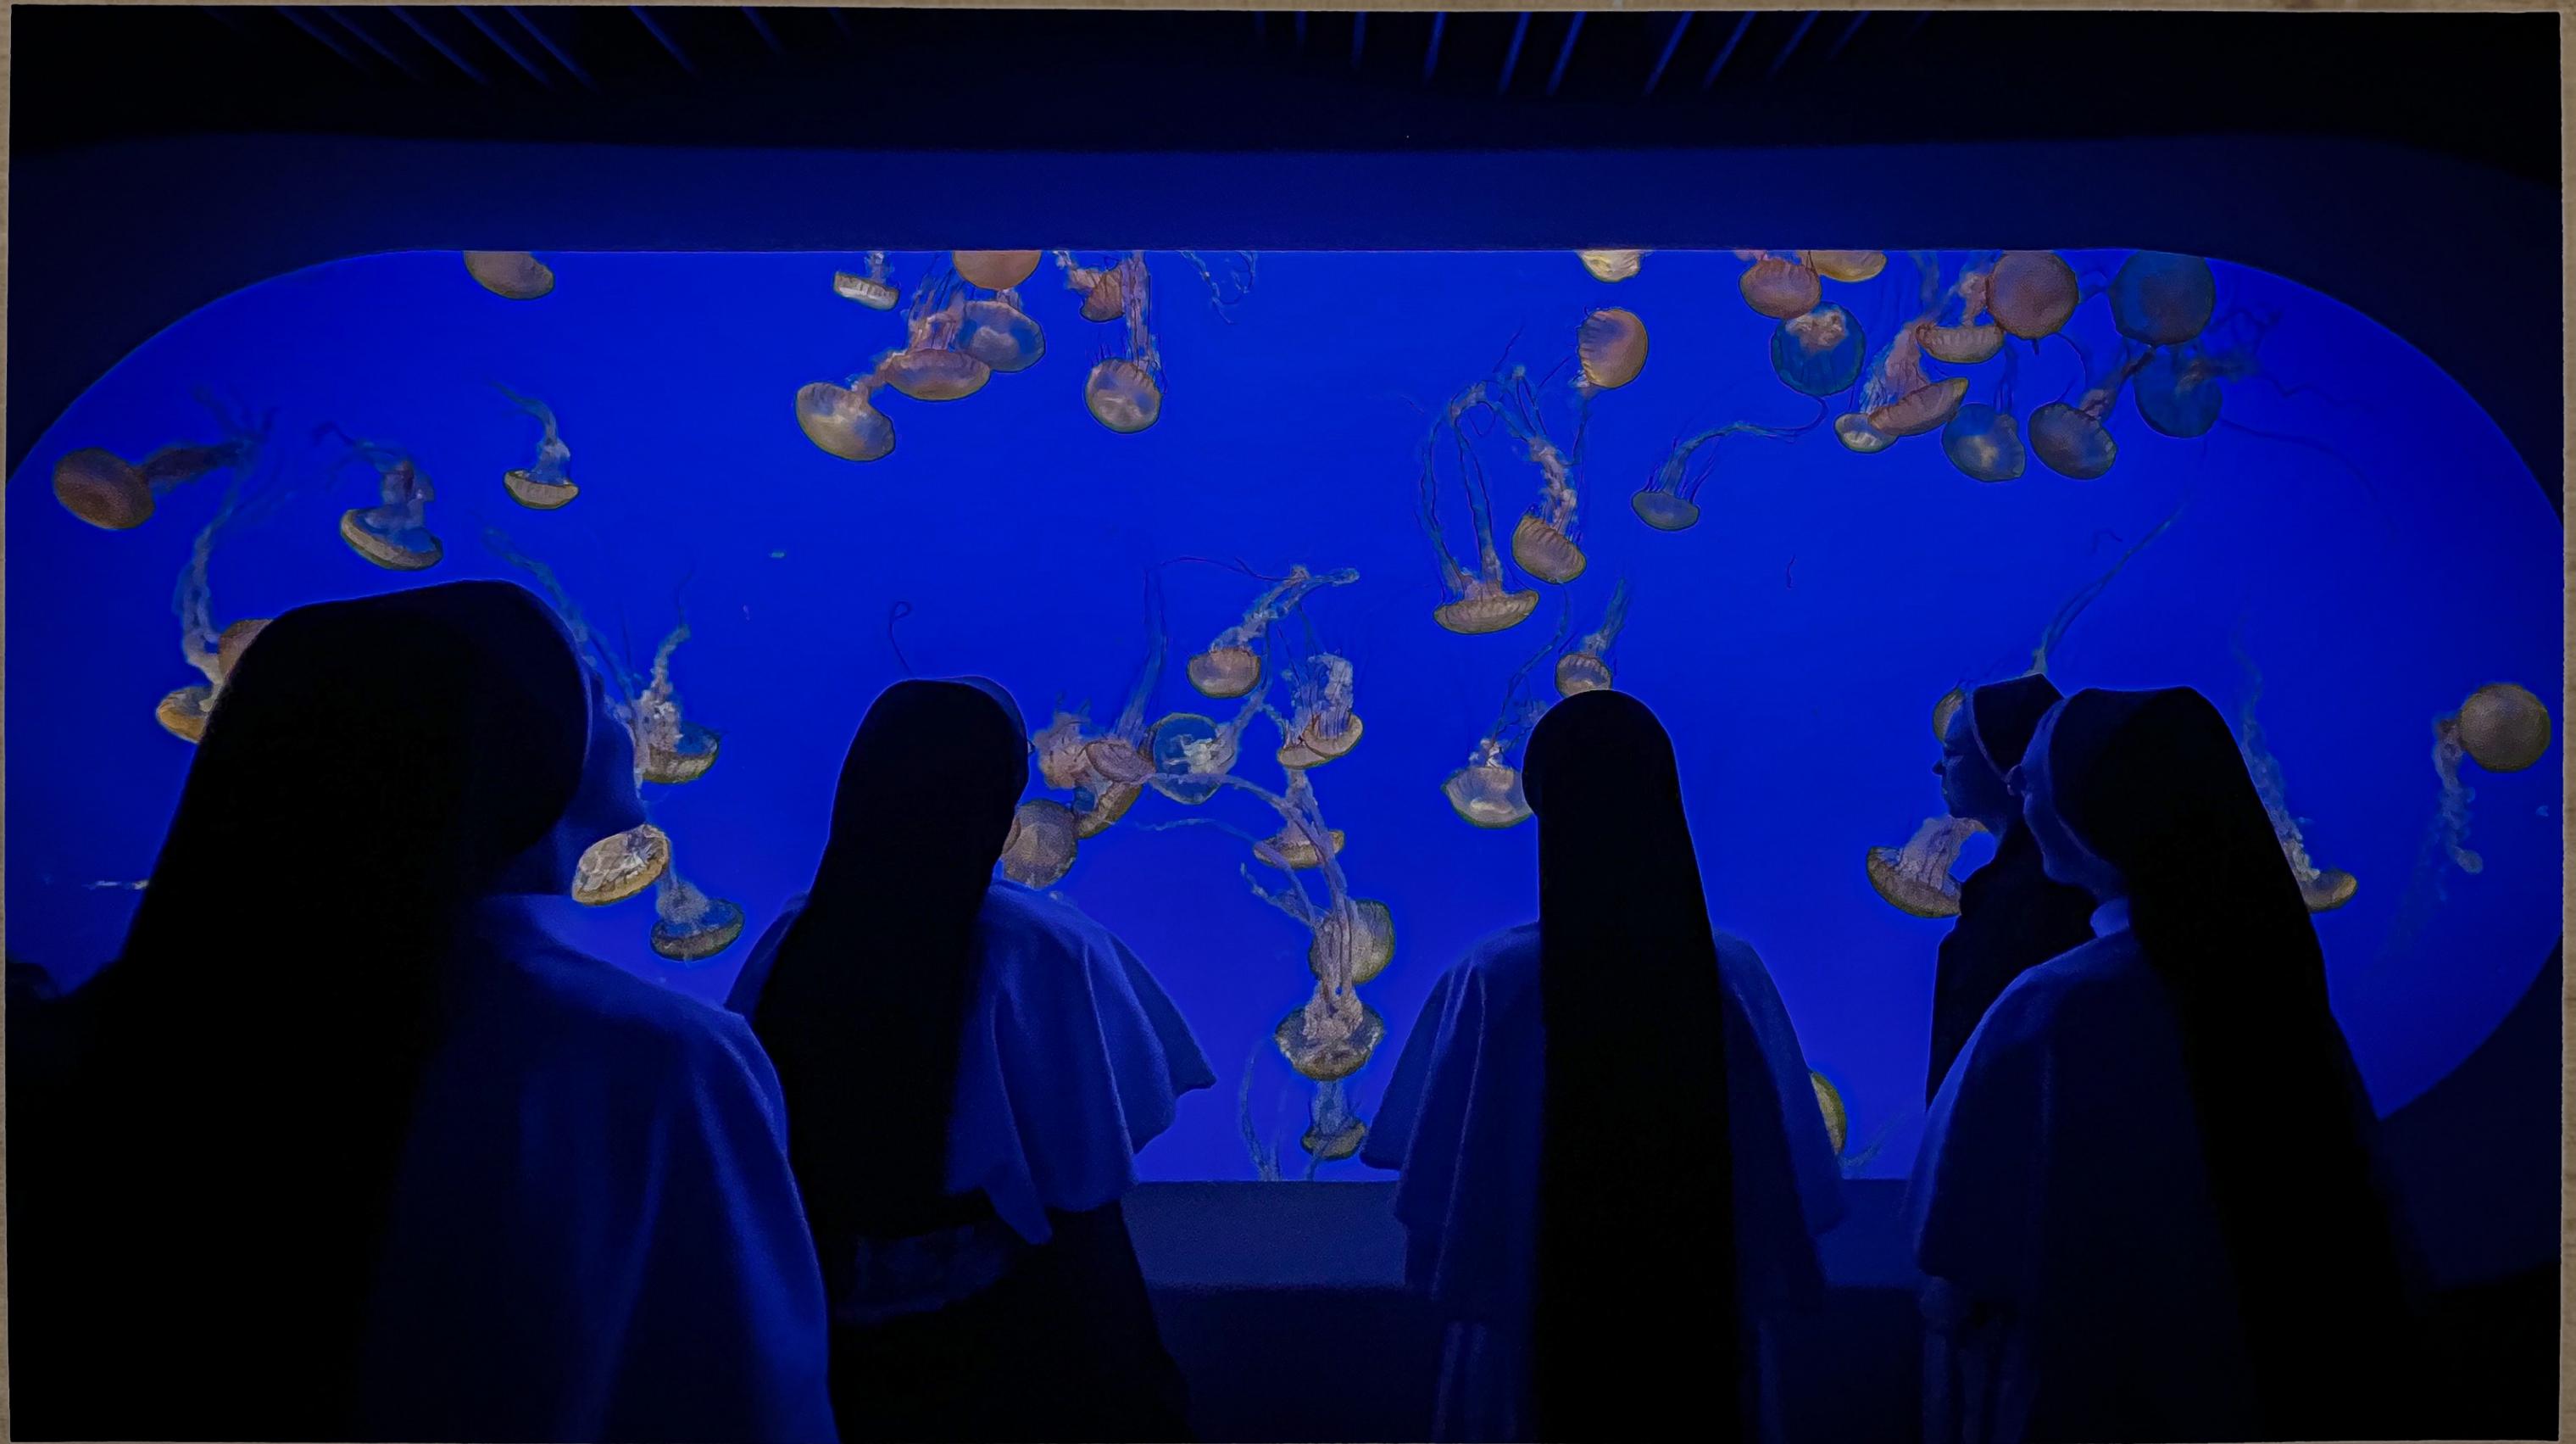

The language of love

The language of love is not
Spanish or Italian
Nor the tender French
Whispered to a companion

Not Romanian or Portuguese
Nor any language from distant seas

It is nothing ancient or antique
For the language of love
Is anything you speak
